## FUNGICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>01315</b>	<b>6672 50W Fungicide 4 x 8 oz.</b>	<b>Thiophanate Methyl 50%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
OHP 6672 50 WP ornamental fungicide controls a broad range of ornamental diseases including anthracnose, black spot, botrytis, leaf spot, powdery mildew and scab. OHP 6672 50 WP is from the benzimidazole family of fungicides and appropriate resistant management practices should always be followed. Labeled for use on: Ornamentals and Turfgrass. Diseases Controlled: Anthracnose, Black Spot, Blights, Botrytis, Fusarium, Leaf Spot, Powdery Mildews, Rhizoctonia and Scabs. Notes: This product is not recommended for the following plants: Swedish Ivy, Boston, Fern and Easter Cactus.					
<b>01310</b>	<b>6672 Fungicide 4.5L 2.5 Gallon</b>	<b>Thiophanate Methyl 46.2%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
OHP 6672 4.5 F ornamental fungicide controls a broad range of ornamental diseases including, anthracnose, black spot, botrytis, leaf spot, powdery mildew and scab, to name a few. OHP 6672 4.5 F is from the benzimidazole family of fungicides and appropriate resistant management practices should always be followed. Labeled for use on: Ornamentals and turfgrass. Diseases Controlled: Anthracnose, Black Spot, Blights, Botrytis, Fusarium, Leaf Spot, Powdery Mildews, Rhizoctonia and Scabs. Packaging: 2.5 gallon container, 2 per case Notes: Continuous agitation is required to keep the material in suspension.					
<b>01295</b>	<b>Actinovate Fungicide 12 x 18 oz.</b>	<b>Streptomyces lydicus WYEC 108 (0.0371%)</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
"Streptomyces lydicus WYEC 108 (0.0371%) "Actinovate SP is a high concentration of a patented beneficial bacterium on a 100% water soluble powder. This product effectively suppresses/controls a wide range of soil borne diseases including Pythium, Phytophthora, Fusarium, Rhizoctonia, Verticillium and other root decay fungus issues. Actinovate SP is also labeled as a spray application for foliar diseases (when applied as a spray) such as Powdery and Downey Mildew, Botrytis, Alternaria and others. SOLD BY THE CASE ONLY. 12 X 18 OZ PER CASE.					
<b>01900</b>	<b>Adorn Fungicide Quart STW</b>	<b>Fluopicolide 39.5%</b>	<b>QT</b>	<b>8</b>	<b>STK</b>
Adorn Fungicide is labeled for control of pythium, phytophthora and downy mildew in ornamental plants. It is formulated as a 4 lb ai/gal suspendable concentrate (SC). The active ingredient in Adorn Fungicide is fluopicolide, which exhibits protective, curative, eradicated and antispore activity. Fluopicolide is locally systemic, translaminar and also moves systemically through xylem tissue. Adorn Fungicide is most effective when applied in a regularly scheduled spray program and used in combination or rotation with other effective fungicides that have a different mode of action (i.e., non Group 43 fungicides).					
<b>01296</b>	<b>Affirm WDG Fungicide 0.5 lb. STW</b>	<b>Polyoxin D Zinc salt 11.3%</b>	<b>EA</b>	<b>4</b>	<b>DNR</b>
Affirm WDG is a concentrated, easy to mix water dispersible granule formulation that delivers excellent disease control. Key diseases controlled include Botrytis, powdery mildew, and Rhizoctonia. Labeled for use on cucurbit vegetables, fruit vegetables, pome fruits, edibles and ornamentals in greenhouses, field and container grown nurseries.					
<b>01015</b>	<b>Agri-Mycin 50 Fungicide 3 lb.</b>	<b>Streptomycin Sulfate 65.8%</b>	<b>BG</b>	<b>11</b>	<b>STK</b>
Agri-Mycin offers control of many bacterial blights, wilts, spots and stem rot. Labeled for a wide variety of plants including some fruits and vegetables. Do not apply thru any type of irrigation system.					
<b>01318</b>	<b>Aliette WDG Fungicide 5 lb.</b>	<b>Aluminum tris (O-ethyl phosphonate) 80%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Aliette brand fungicide delivers two-way systemic protection against Pythium & Phytophthora. Labeled for a wide range of crops including Ornamentals & bedding plants grown in the field, nursery or greenhouse. Also labeled for landscape & turf uses as well. Can be applied by a soil drench or foliar spray. Always read and follow current label instructions. Active Ingredient: 80% Aluminum tris (O-ethyl phosphonate)					
<b>01319</b>	<b>Areca Fungicide STW 5 lb.</b>	<b>Aluminum tris (O-ethyl phosphonate) 80%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Areca is a systemic fungicide that may be applied to a wide range of ornamental flowering and foliage plants as a foliar spray, drench or dip for control of diseases caused by Pythium, Phytophthora, and Downy Mildew pathogens. Areca can also be used for suppression of bacterial blight caused by certain pathogens of Xanthomonas campestris. Areca may be used on ornamentals and bedding plants grown in field nursery, greenhouse, landscape and conifer nurseries. Compare to Aliette WDG.					
<b>01321</b>	<b>Astun Fungicide STW Quart</b>	<b>Isofetamid 36%</b>	<b>QT</b>	<b>4</b>	<b>STK</b>
Astun Ornamental Fungicide provides preventative, and early curative activity on botrytis diseases of plants grown in commercial greenhouses and nurseries. Astun is most effective when used as a protectant fungicide and applied before the disease damages the crop. As a stand-alone SDHI (MOA Group 7) fungicide, it offers growers flexibility in tank mixing depending on the target disease complex. Astun is formulated in a user-friendly Suspension Concentrate (SC) formulation.					
<b>01710</b>	<b>Banner Maxx II Fungicide Agency Gallon</b>	<b>Propiconazole 14.3%</b>	<b>GL</b>	<b>2</b>	<b>STK</b>
Banner MAXX is a systemic fungicide that provides effective broad-spectrum disease control in turf and ornamentals. It is a microemulsion concentrate formulation providing excellent tank mix compatibility and stability; no odor, and mixes into a clear solution. Banner Maxx controls anthracnose, black spot, fusarium, leaf spot, powdery mildew, rhizoctonia, rust, sclerotinia, wilts and blights.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. # CHEMICALS

## FUNGICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>01405</b>	<b>Banrot 40WP Fungicide 2 lb.</b>	<b>Etridiazole 15%, Thiophanate-methyl 25%</b>	<b>BG</b>	<b>6</b>	<b>STK</b>
For many years, growers have relied on Banrot WP to control pythium, phytophthora, fusarium, rhizoctonia, theilaviopsis, cylindrocladium and other diseases. Banrot WP makes it simple to use by eliminating risky tank mixing and increasing the residual effect, which means it can be applied less frequently than other brands. Not registered for sale in California.					
<b>01805</b>	<b>Captan 50WP Fungicide 5 lb.</b>	<b>N-Trichloromethylthio-4-cyclohexene-1, 2-diacboximide 48.93%</b>	<b>BG</b>	<b>10</b>	<b>STK</b>
Captan is labeled for use on ornamentals, turf, fruit trees for control of black spot, blossom blight, botrytis, damping off, leaf spot and rust. Use as a drench or spray.					
<b>01299</b>	<b>Champ Dry Prill Fungicide 20 lb.</b>	<b>Copper Hydroxide 57.6%</b>	<b>BG</b>	<b>100</b>	<b>STK</b>
Champ Dry Prill is the only dry prill copper product on the market. It is labeled for use on ornamentals, trees, turf, vegetables, tree crops, field crops, berries and more. Champ controls various blights, mildews, leaf spots and other pathogens. See label for specifics. Available in a 8 lb. and 20 lb. bag.					
<b>01298</b>	<b>Champ Dry Prill Fungicide 8 lb.</b>	<b>Copper Hydroxide 57.6%</b>	<b>BG</b>	<b>5</b>	<b>OAN</b>
Champ Dry Prill is the only dry prill copper product on the market. It is labeled for use on ornamentals, trees, turf, vegetables, tree crops, field crops, berries and more. Champ controls various blights, mildews, leaf spots and other pathogens. See label for specifics. Available in a 8 lb. and 20 lb. bag.					
<b>01301</b>	<b>Cuproxat FL Fungicide 1 Gallon</b>	<b>Basic copper sulfate 27.1%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Cuproxat premium copper fungicide from Nufarm is engineered with proprietary chemistry to deliver uniform, sub-micron particles 80 percent of particles are less than 1 micron. The smaller particle size delivers better plant coverage, which means better protection against fungal and bacterial diseases. Packed in 1 gallon containers. 4 per case.					
<b>01715</b>	<b>Daconil WeatherStik Fungicide Agency 2.5 gal.</b>	<b>Chlorothalonil 54.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Daconil is for use on production ornamentals ( both greenhouse and nursery), golf course tees, fairways, greens, non-residential turfgrasses, sod farms, and ornamental turfgrasses. Daconil controls 14 turfgrass diseases, including dollar spot, brown patch, gray leaf spot, algae, leaf spot, melting out, anthracnose, rust, Fusarium patch, Gray snow mold and red thread. In ornamentals, Daconil controls over 50 major diseases, including powdery mildew, scab, rust, as well as many other foliar and leaf spots and blights.					
<b>01505</b>	<b>Decree 50 WDG Fungicide 2.5 lb.</b>	<b>Fenhexamid 50.0%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Decree 50 WDG fungicide controls Botrytis on various greenhouse vegetables, ornamental crops, forestry conifers and non-bearing fruit trees.					
<b>01225</b>	<b>Dithane 75DF T&amp;O Fungicide 12 lb.</b>	<b>Manganese 15%, Zinc 1.87%, Ethylene 58.13%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Dithane Rainshield turf and ornamental specialty fungicide is a broad spectrum ornamental contact fungicide for preventative control of rust, scab and other key diseases. Dithane offers control of major leaf spots and blights of ornamental plants and turf.					
<b>01719</b>	<b>Downy Mildew &amp; Phytophthora Agency MP</b>	<b>Mandipropamid, Mefanoxam, Oxathiapiprolin</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
Syngenta's Downy Mildew + Phytophthora Multipak contains 2 quarts of Micora fungicide, 1 gallon of Subdue fungicide and 1 pint of Segovis fungicide. Buying the multipak saves money over buying the products individually.					
<b>01227</b>	<b>Eagle 20EW Fungicide Pint</b>	<b>Myclobutanil, triazole 19.7%</b>	<b>EA</b>	<b>8</b>	<b>STK</b>
Eagle 20EW specialty fungicide is a systemic, protectant and curative fungicide for the control of certain diseases. Eagle 20EW controls powdery mildew, certain leaf spots, rust, white rust and other diseases. Labeled for use on: Turfgrass, landscape ornamentals, greenhouse & nursery ornamentals. apples, stone fruits and grapes.					
<b>01925</b>	<b>Empress Intrinsic Fungicide 24 oz.</b>	<b>Pyraclostrobin 23.3%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Empress Intrinsic brand fungicide provides disease protection for four root and crown pathogens for greenhouse and nursery growers. Disease control and plant health benefits are based on the active ingredient pyraclostrobin. Diseases controlled include Fusarium, Phytophthora, Pythium and Rhizoctonia. See label for specifics.					
<b>01725</b>	<b>Heritage Fungicide Agency 1 lb.</b>	<b>Azoxystrobin, methoxyacrylate 50%</b>	<b>LB</b>	<b>36</b>	<b>STK</b>
Heritage is a fungicide with broad spectrum, preventative fungicide with systemic and curative properties recommended for the control of many important plant diseases on turf, ornamentals, vegetables and commercial conifer and rose production. May be applied as a foliar spray in alternating spray programs or in tank mixes with other registered turf and ornamental protection products. See label for more details on vegetable use.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. Please check with your local Extension Service to ensure registration status. ● **Product Type:** **STK**- Stock Item, **OAN**- Order as Needed (not stocked), **DNR**- Discontinued Item.

Product	Description	Active Ingredient	UM	Pack	Type
<b>01326</b>	<b>Kalmor Fungicide/Bactericide 2.5 lb.</b>	<b>Copper Hydroxide 46.1%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Kalmor fungicide/bactericide is an effective broad spectrum agent for prevention and control of diseases in a variety of plants and crops. Labeled for use on ornamentals and greenhouse vegetables. Diseases controlled include anthracnose, bacterial blights (pseudomonas, erwinia), botrytis, cercospora leaf spot, downy mildew, powdery mildew, phomopsis, volutella leaf blight and more.					
<b>01729</b>	<b>Medallion WDG Fungicide Agency 8 oz.</b>	<b>Fludioxonil 50.0%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Medallion WDG features a water dispersible granule formulation means it is easier to mix, measure, store and apply. Fludioxonil, the active ingredient in Medallion WDG, is extremely effective at low use rates and begins working immediately to protect plants. It is labeled for use in greenhouses, lath, shade houses, outdoor nurseries, interiorscapes, and commercial and residential landscapes, Medallion WDG can be used in a variety of operations. Medallion provides reliable protection against a wide range of key diseases from seedling to final production, including Botrytis, Alternaria, Rhizoctonia and Fusarium. Medallion WDG delivers 21-28 day residual control as a drench and 7-14 day residual control as a foliar spray.					
<b>01750</b>	<b>Micora Fungicide Agency Qt.</b>	<b>Mandipropamid 23.3%</b>	<b>QT</b>	<b>4</b>	<b>STK</b>
Micora is a protectant fungicide for control of diseases caused by downy mildew fungi and Phytophthora spp. on ornamentals grown in greenhouse and outdoor production, including certain vegetable plants grown for resale. It is highly effective against spore germination, with secondary effects (prevention and reduction) on mycelial growth and sporulation.					
<b>01756</b>	<b>Mural + Mainspring GNL Agency Multipack</b>	<b>Cyantraniliprole 18.66%</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
Syngenta's multipaks saves money over buying the products individually. The Mural + Mainspring GNL multipak contains Contains 3 of the 1 lb. Mural® fungicide and 2 of the 1 pt Mainspring GNL fungicide.					
<b>01755</b>	<b>Mural Fungicide Agency 1 lb.</b>	<b>Azoxystrobin 30%, Benzovindiflupyr 15.0%</b>	<b>LB</b>	<b>6</b>	<b>STK</b>
A broad-spectrum fungicide for prevention and control of listed diseases in ornamental crops grown in greenhouses, shade-houses, lath houses, outdoor nurseries, retail nurseries, commercial landscapes and vegetable transplants grown for resale to consumers. Mural provides control of key foliar, stem and root diseases including Botrytis, Rhizoctonia and leaf spots like powdery mildew and anthracnose.					
<b>01320</b>	<b>OHP Chipco 26019 Fungicide 2 lb.</b>	<b>Iprodione 50.0%</b>	<b>BG</b>	<b>6</b>	<b>STK</b>
Chipco 26019 N/G is a broad spectrum fungicide that may be applied safely to a wide range of ornamental flowering and foliage plants, either as a foliar spray, drench, or dip. Chipco 26019 N/G fungicide contains iprodione, 50% active ingredient per pound. Labeled for use on: Ornamentals in greenhouses and nurseries, including conifer nurseries. Diseases Controlled: Alternaria, Botrytis, Rhizoctonia, Fusarium Corn rot, Cylindrocladium and other diseases. Packaging: 2 lbs. container, 6 per case Notes: Do not use as a drench on impatiens and pothos. Do not use on Spathiphyllum.					
<b>01045</b>	<b>Orvego Fungicide 28 oz.</b>	<b>Ametoctradin 26.9%, Dimethomorph 20.2%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Orvego fungicide is a combination of ametoctradin and dimethomorph. Orvego provides control of all major ornamental downy mildews and Phytophthora species tested, with excellent plant quality and safety. Orvego fungicide is labeled for use in greenhouse, field and container nurseries, lathhouses and interiorscapes. Labeled for use on roses. Orvego acts as a penetrant with translaminar and locally systemic activity following a foliar application. When used as a soil drench, it protects plant roots and crown as a translaminar, locally systemic fungicide. Active Ingredients: ametoctradin and dimethomorph.					
<b>01735</b>	<b>Subdue GR Fungicide 25 lb.</b>	<b>Mefenoxam 1.0%</b>	<b>BG</b>	<b>40</b>	<b>STK</b>
Subdue is labeled for use on a wide variety of ornamentals as well as turf. Subdue controls damping off, downy mildew phytophthora and pythium. Subdue granular is used as a soil incorporation.					
<b>01732</b>	<b>Palladium Fungicide Agency 2 lb.</b>	<b>Cyprodinil 37.5%, Fludioxonil 25.0%</b>	<b>EA</b>	<b>6</b>	<b>OAN</b>
Palladium controls foliar and stem diseases of ornamentals caused by Botrytis spp., rhizoctonia spp., Cercospora spp., Alternaria spp., Septoria spp., and Myrothecium spp. and certain other pathogens when applied on a regular schedule as a full coverage spray. Palladium may be used on container, bench, flat, plug, bed or field-grown ornamentals in field nursery plantings, forest nurseries, commercial landscapes, greenhouses, lath and shade houses. Apply Palladium as a foliar spray at the rates listed in the label when plants are dry or nearly dry. Apply just to runoff, when conditions are favorable for disease development. Under severe disease conditions, use the highest rate and shortest interval corresponding with the application schedule found on the label. Non-Stock Item					
<b>01635</b>	<b>Phyton 35 Bactericide Gallon</b>	<b>Copper Sulphate Pentahydrate 21.27%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Phyton 35 provides excellent fungal and bacterial disease control, long residual, and no visible residue in a formula that significantly expands the spectrum of crops where it can be applied. Phyton 35 is effective on not only ornamental and nursery crops, but also on food crops including fruits, vegetables, herbs and garden plants. See label for specifics.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. Please check with your local Extension Service to ensure registration status. ● **Product Type:** **STK**- Stock Item, **OAN**- Order as Needed (not stocked), **DNR**- Discontinued Item.

Product	Description	Active Ingredient	UM	Pack	Type
<b>01630</b>	<b>Phyton 35 Bactericide Liter</b>	<b>Copper Sulfate Pentahydrate 21.27%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Phyton 35 provides excellent fungal and bacterial disease control, long residual, and no visible residue in a formula that significantly expands the spectrum of crops where it can be applied. Phyton 35 is effective on not only ornamental and nursery crops, but also on food crops including fruits, vegetables, herbs and garden plants. See label for specifics.					
<b>01510</b>	<b>Pipron Fungicide Quart</b>	<b>Piperalin 84.4%</b>	<b>QT</b>	<b>12</b>	<b>OAN</b>
Pipron Fungicide: The Industry Standard for fast, reliable control of powdery mildew for greenhouse ornamentals...Pipron is a contact fungicide, which provides excellent eradication activity on powdery mildew. A proven product that has been utilized effectively in the cut rose market for over 20 years, Pipron is fast acting, reliable, and non-phytotoxic to most species. Pipron boasts a visible mildew kill the same day as it is used, but has no residual activity.					
<b>01191</b>	<b>Quali-Pro Enclave Fungicide STW 2.5 gallon</b>	<b>Chlorothalonil, Iprodione, Thiophanate methyl, Tebuconazole</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Quali-Pro's Enclave flowable fungicide is a patented, broad-spectrum fungicide that gives a powerful weapon in the war on fungal diseases in turfgrass and ornamentals. Contains 28.7% Chlorothalonil, 9.4% Iprodione, 9.4% Thiophanate methyl, 2.8% Tebuconazole. Packed in a 2.5 gallon container. Restricted use in Massachusetts and New York. Delivers effective, long-lasting protection from anthracnose, brown patch, dollar spot, snow mold and a broad range of ornamental diseases. Labeled for use on golf courses, commercial turf, landscape ornamentals, nursery & greenhouse.					
<b>01195</b>	<b>Quali-Pro Fosetyl-AI 80 WDG Fungicide 5.5 lb.</b>	<b>Aluminum tris (0-ethyl phosphonate) 80%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Fosetyl-AI 80 WDG Fungicide from Quali-Pro provides long-lasting, broad spectrum preventative control of diseases such as Pythium and Phytophthora in turf, ornamentals and bedding plants. True up-and-down systemic action for effective, preventative turf/plant disease control. Stimulates defense mechanisms, enhances plant vigor. Single application delivers up to 30 days protection. Use sites: nursery, greenhouse, golf courses, turf. Effective Against: pythium blight, yellow tuft, phytophthora, downy mildew, fire blight, bacterial blight. Active Ingredients: Aluminum tris 80%.					
<b>01302</b>	<b>Quali-Pro Ipro 2 Fungicide 2.5 Gallon</b>	<b>Iprodione 23.8%</b>	<b>EA</b>	<b>2</b>	<b>OAN</b>
Iprodione fungicide provides proven control of Botrytis, Fusarium, Rhizoctonia and many other diseases in turf and ornamentals. Active Ingredient: 23.3% Iprodione. EPA Registration 81959-4. Caution signal word. Brand alternative: Chipco 26GT. WARNING! This product can expose you to chemicals including iprodione which is known to the State of California to cause cancer. For more information go to <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .					
<b>01205</b>	<b>Quali-Pro Mefenoxam 2 AQ Fungicide Gallon</b>	<b>Mefenoxam 22.5%</b>	<b>GL</b>	<b>2</b>	<b>OAN</b>
Mefenoxam 2 AQ Water-based formulation features low odor. Systemic mode of action and translocation through the plant can provide up to 3 weeks protection. Labeled for use in Nurseries, Greenhouses, Landscape, Turf and Trees. Effective against Pythium, Phytophthora, Yellow Tuft, Downy Mildew. Active Ingredient: Mefenoxam. Non Stock. Special order. Allow adequate time for delivery.					
<b>01220</b>	<b>Terrazole 35W Fungicide 2 lb.</b>	<b>Etridiazole 35%</b>	<b>EA</b>	<b>6</b>	<b>OAN</b>
Terrazole 35W is an effective soil fungicide for prevention and control of damping-off, root rot and stem diseases caused by Pythium and Phytophthora species in ornamental and nursery crops. Labeled for use on ornamental and nursery crops as well as golf course turf.					
<b>01760</b>	<b>Segovis Fungicide 1 pt.</b>	<b>Oxathiapiprolin 18.7%</b>	<b>EA</b>	<b>8</b>	<b>STK</b>
For control of diseases of ornamental plants grown in greenhouses, outdoor growing structures (including shade houses, lath houses and other outdoor growing structures), and nurseries and outdoor ornamental plants grown in commercial landscapes. Segovis fungicide sets a higher standard for control of downy mildew and Phytophthora spp. diseases. Its strong activity and systemic properties provide long-lasting control when applied as a drench or foliar spray at low use rates. Fueled by a new mode of action, Segovis is a critical part of a rotation program to help manage disease resistance on a wide range of plants, trees and shrubs.					
<b>01331</b>	<b>Segway O Fungicide STW 64 oz.</b>	<b>Cyazofamid 34.5 %</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Segway O Greenhouse and Nursery fungicide is a flowable suspension concentrate formulation that controls pythium, crown and root, and aerial phytophthora, and downy mildews on ornamental plants grown in commercial greenhouses and nurseries. Segway O should be utilized as a protectant fungicide and applied before conditions are favorable for disease development. Depending on disease pressure, Segway O offers protection for a period of 7 to 28 days.					
<b>01330</b>	<b>Segway O Fungicide STW Pint</b>	<b>Cyazofamid 34.5 %</b>	<b>PT</b>	<b>8</b>	<b>STK</b>
Segway O Greenhouse and Nursery fungicide is a flowable suspension concentrate formulation that controls pythium, crown and root, and aerial phytophthora, and downy mildews on ornamental plants grown in commercial greenhouses and nurseries. Segway O should be utilized as a protectant fungicide and applied before conditions are favorable for disease development. Depending on disease pressure, Segway O offers protection for a period of 7 to 28 days.

<b>01335</b>	<b>SoilGard 12G Fungicide 5 lb.</b>	<b>Gilocladium virens strain 12%</b>	<b>BG</b>	<b>4</b>	<b>STK</b>
T. virens, the active ingredient in SoilGard 12G is a naturally occurring soil fungus, which is antagonistic to plant pathogenic fungi such as Pythium and Rhizoctonia, thereby aiding in control of these damping off and root rot pathogens. SoilGard 12G acts as a preventative and will protect non-infected plants. It may not, however, cure already infected plants. Where possible allow the treated soil or media to incubate for 1 day prior to planting to achieve the best results. Do not use other soil fungicides at the time of incorporation. Later addition of fungicides is acceptable but usually unnecessary. Labeled for use on: Ornamentals and food crop plants grown indoors and outdoors, in greenhouses, nurseries, and interiorscapes. Diseases Controlled: Pythium and Rhizoctonia (Damping off and Root Rot) Packaging: 7.5 lbs. bags, 6 per case.					
<b>01304</b>	<b>Spirato GHN Fungicide Pint STW</b>	<b>Fludioxonil 40.3%</b>	<b>EA</b>	<b>8</b>	<b>OAN</b>
Spirato GHN is a go-to product for foliar, stem and root diseases providing defense and control with low use rates and an easy-to-use liquid formulation. Key diseases include Rhizoctonia, Alternaria, Botrytis, Thielaviopsis, Cercospora, Cylindrocladium, Fusarium and others. Labeled for use on ornamentals such as Azaleas, Begonias, Pansies, Poinsettias and more. Expanded label includes brassica leafy vegetables (such as broccoli, cauliflower, and kale), herbs (such as basil, chive, cilantro, parsley and rosemary), and leafy vegetables (such as arugula, lettuce and swiss chard). May be applied as a foliar spray or soil drench. Active ingredient: fludioxonil (40.3%).					
<b>01520</b>	<b>Stature SC Fungicide 25 oz.</b>	<b>Dimethomorph 43.5%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Stature SC fungicide is the new flowable formulation of dimethomorph, the active ingredient with proven performance for preventive control of Phytophthora and downy mildew diseases. Stature SC is labeled for use in greenhouse, field and container nurseries, shadehouses and lathhouses, including conifer seedling nurseries.					
<b>01745</b>	<b>Subdue Maxx Fungicide Agency Gallon</b>	<b>Mefenoxam 22.0%</b>	<b>GL</b>	<b>2</b>	<b>AGY</b>
Subdue MAXX fungicide offers superior control of Pythium blight. It is a microemulsion concentrate formulation providing excellent tank mix compatibility and stability; no odor, and mixes into a clear solution. For added control add Medallion to the tank mix.					
<b>01740</b>	<b>Subdue Maxx Fungicide Quart</b>	<b>Mefenoxam 22.0%</b>	<b>QT</b>	<b>12</b>	<b>STK</b>
Subdue MAXX fungicide offers superior control of Pythium blight. It is a microemulsion concentrate formulation providing excellent tank mix compatibility and stability; no odor, and mixes into a clear solution. For added control add Medallion to the tank mix. Active Ingredient: Mefenoxam.					
<b>01343</b>	<b>Terraguard SC Fungicide 1 Qt.</b>	<b>Triflumizole 42.14%</b>	<b>QT</b>	<b>12</b>	<b>OAN</b>
Terraguard SC controls Rhizoctonia root rot, one of the most common soilborne diseases, as well as other hard to control diseases such as Thielaviopsis, Cylindrocladium, powdery mildew, and leaf spots. Terraguard SC is a locally systemic fungicide that provides protection of hard to control diseases. Terraguard SC can be used as a cutting soak, soil drench, foliar spray or through chemigation for control of diseases on ornamental plants grown in enclosed commercial structures such as greenhouses, shadehouses and interiorscapes. Labeled for use on: Ornamental crops grown in the greenhouse, interiorscapes and nursery.					
<b>01223</b>	<b>Terrazole L Fungicide Quart</b>	<b>Etridiazole 44.3%</b>	<b>EA</b>	<b>8</b>	<b>OAN</b>
Terrazole L is an emulsifiable concentrate (EC) formulation of the active ingredient etridiazole. Terrazole L is labeled for pythium and phytophthora control on ornamentals grown in production. It is also labeled for pythium control on golf course tees and greens. Terrazole L can be used as both a preventative and curative product.					
<b>01345</b>	<b>Triact 70 Fungicide 2.5 Gallon</b>	<b>Clarified Hydrophobic Extract of Neem Oil 70%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Triact 70 is a broad-spectrum fungicide, miticide and insecticide (OMRI listed). This highly effective and economical botanical oil may be used indoors as well as outdoors on ornamental flowering plants, trees, shrubs and foliage grown in greenhouses, interiorscapes and commercial landscapes. Labeled for use on: For indoor/outdoor use on ornamental flowering plants, trees, shrubs, foliage grown in nurseries, greenhouses and commercial landscapes.					
<b>01350</b>	<b>Triathlon BA Biofungicide Gallon</b>	<b>Bacillus amyoliquefaciens 98.85%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
OHP's Triathlon BA biofungicide/bactericide is labeled for use on ornamentals, vegetables (fruiting and leafy), legumes, cucurbits, corms, fruits, tree nuts, and herbs and spices. Diseases controlled include botrytis, powdery mildew, downy mildew, rusts, leaf spots, scab, alternaria, pythium, phytophthora, rhizoctonia, fusarium, and bacterial spot. Can be part of a traditional or organic production program. Active Ingredient: Bacillus amyoliquefaciens strain D747 98.85%. Packaged in a gallon sized container. 4 per case.

## PLANT GROWTH REGULATORS

Product	Description	Active Ingredient	UM	Pack	Type
<b>02506</b>	<b>A-Rest PGR Agency 2.5 Gallon</b>	<b>Ancymidol 0.0264%</b>	<b>EA</b>	<b>2</b>	<b>OAN</b>
A-Rest is a plant growth regulator which is used on container grown bedding plants, flowers and foliage plants. A-Rest produces a plant that is more compact by inhibiting gibberellin biosynthesis, which results in shorter stem length. A-Rest helps growers produce high quality plants that are more compact, uniform in height, darker in color, more able to withstand shipping, require less water...and best of all, plants that are more attractive to the consumer. Active ingredient: Amcymidol.					
<b>02505</b>	<b>A-Rest PGR Quart</b>	<b>Ancymidol 0.0264%</b>	<b>QT</b>	<b>12</b>	<b>STK</b>

<b>02205</b>	<b>B-Nine WSG PGR 1 lb.</b>	<b>Daminozide 85%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
B-Nine WSG reduces plant height in ornamental plants by reducing internode length. Other B-Nine WSG benefits include a deeper green color and reduced breakage during shipping. B-Nine WSG when applied to plant foliage is absorbed into the leaf, moves within the plant to the growing points to reduce internode elongation. Labeled for use on ornamentals grown in commercial or research greenhouses, shadehouses, and nurseries. Can be used on bedding plants/flowering plants, foliage, chrysanthemums, gardenias, hydrangeas, poinsettias, plugs and others.					
<b>02210</b>	<b>B-Nine WSG PGR 5 lb.</b>	<b>Daminozide 85%</b>	<b>EA</b>	<b>8</b>	<b>STK</b>

## CHEMICALS

## PLANT GROWTH REGULATORS

**02715 Bonzi PGR Agency 2.5 gallon****Paclobutrazol 0.4%****EA****2****STK**

Bonzi is a plant growth regulator for use on ornamental plants grown in containers in nurseries, greenhouses, shadehouses, and interiorscapes. It is the leading ornamental plant growth regulator (PGR) in the industry. Bonzi keeps plants uniformly compact, hardy, and looking their best.

**02705 Bonzi PGR Quart****Paclobutrazol 0.4%****QT****6****STK**

Bonzi is a plant growth regulator for use on ornamental plants grown in containers in nurseries, greenhouses, shadehouses, and interiorscapes. It is the leading ornamental plant growth regulator (PGR) in the industry. Bonzi keeps plants uniformly compact, hardy, and looking their best.

**02310 Cycocel PGR Gallon****Chlormequat 11.8%****GL****4****STK**

Cycocel is among the most reliable and widely used plant growth regulators on the market today. Cycocel may be used on any crop in the greenhouse or nursery including but not limited to, poinsettias, hibiscus, azaleas, and geraniums to reduce stem elongation, induce early flowering, improve flowering, and to produce compact plants with multiple buds per shoots. Labeled for use on ornamentals grown in commercial or research greenhouses, shadehouses, and nurseries. Can be used on bedding plants, flowering plants, foliage, chrysanthemums, gardenias, hydrangeas, poinsettias, plugs and others.

**02305 Cycocel PGR Quart****Chlormequat 11.8%****QT****4****STK**

Cycocel is among the most reliable and widely used plant growth regulators on the market today. Cycocel may be used on any crop in the greenhouse or nursery including but not limited to, poinsettias, hibiscus, azaleas, and geraniums to reduce stem elongation, induce early flowering, improve flowering, and to produce compact plants with multiple buds per shoots. Labeled for use on ornamentals grown in commercial or research greenhouses, shadehouses, and nurseries. Can be used on bedding plants, flowering plants, foliage, chrysanthemums, gardenias, hydrangeas, poinsettias, plugs and others.

**02290 Florel PGR Gallon****Ethephon 3.9%****GL****4****STK**

Florel brand Growth Regulator is registered to reduce or eliminate undesirable fruit development on many ornamental trees and shrubs. It also works on many other species that produce nuisance fruit. Application must be made prior to fruit set; apply at the mid to full-bloom stage in sufficient water to wet (do not spray to run off). Good spray coverage is essential for complete fruit elimination. Application made too early or too late will also not be effective.

**02315 Pac O PGR 1 gal.****Paclobutrazol 0.4%****GL****4****STK**

Pac O ornamental growth regulator is extremely active and can significantly reduce unwanted plant growth through reduced internode elongation. Active ingredient: Paclobutrazol.

**02910 Sumagic PGR Gallon****Uniconazole-P .055%****GL****4****STK**

Sumagic is an effective growth retardant on a wide variety of ornamental crops. Sumagic reduces plant height by reducing internode elongation through inhibition of gibberelin biosynthesis. The result is more desirable compact and marketable plants. Sumagic has also been shown to improve the quality of plants even in the absence of growth reduction. Some of these desirable qualities include darker colors, higher chlorophyll content, greater leaf thickness, stronger stems, increased water retention and in some cases greater flower production and size.

**02510 Topflor PGR Agency 2 Lt****Flurprimidol 0.38%****EA****4****OAN**

Topflor is a plant growth regulator (PGR) for growers of containerized ornamental plants in commercial nurseries, greenhouses, and shadehouses. The positive attributes of Topflor will allow growers to produce top quality plants resulting in improved marketability of their crop.

## HERBICIDES

<b>03700</b>	<b>Barricade 4FL Herbicide Agency Gallon</b>	<b>Prodiamine 40.7%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Barricade is a preemergence herbicide that offers low rate, season-long control of 30 grassy and broadleaf weeds, including crabgrass, goosegrass and Poa annua, in turf and ornamentals. Its unique, non-staining active ingredient and application flexibility have quickly made Barricade one of the most popular herbicides in the green industry. Barricade is available in either a 4FL flowable or 65WG water-dispersible granule formulations. Apply in the fall to control crabgrass through the following growing season.					
<b>03897</b>	<b>Cheetah Pro Post Emergent Herbicide 2.5 gallon</b>	<b>Glufosinate ammonium 24.5%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Cheetah Pro is a non selective post emergent herbicide containing Glufosinate. This product is foliar and has little or no soil activity. Weeds emerging after application will not be affected. Necrosis of leaves and young shoots begins 2-4 days after application under active growing conditions.					
<b>03895</b>	<b>Cheetah Pro Post Emergent Herbicide 64 oz.</b>	<b>Glufosinate ammonium 24.5%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Cheetah Pro is a non selective post emergent herbicide containing Glufosinate. This product is foliar and has little or no soil activity. Weeds emerging after application will not be affected. Necrosis of leaves and young shoots begins 2-4 days after application under active growing conditions.					
<b>03603</b>	<b>Clipper Herbicide 1 lb.</b>	<b>Flumioxazin 57%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Clipper aquatic herbicide delivers fast and selective control of invasive and nuisance plants. Plus it dissipates quickly from the water column meaning minimal irrigation restrictions, and does not accumulate in sediment. Key uses include management of undesirable aquatic vegetation in slow moving or quiescent waters and can be applied in many settings including bayous, drainage ditches, lakes, marshes, ponds (including golf courses) and reservoirs. Key weeds controlled include alligatorweed, cabomba, coontail, curlyleaf pondweed, duckweed, Eurasian watermilfoil, fanwort, filamentous algae, frogs-git, hydrilla, pondweed, sago pondweed, water fern, water lettuce, water pennywort, watermeal, and variable-leaf watermilfoil. Active ingredient: flumioxazin (51%).					
<b>03202</b>	<b>Dimension 2EW Herbicide .5 gal.</b>	<b>Dithiopyr 24%</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
Dimension 2EW pre emergent herbicide controls crabgrass and other annual grasses and broadleaf weeds. Labeled for use on: established lawns, commercial sod farms, ornamental turf, field-grown nursery ornamentals and landscape ornamentals. Weeds controlled: Crabgrass, Goosegrass, Barnyardgrass, Sandbur, Bittercress, chickweed, oxalis buttercup, common purslane, spurge and others.					
<b>03380</b>	<b>Diquat SPC 2L Herbicide Gal.</b>	<b>Diquat dibromide 37.3%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Diquat 2 L is a fast acting, broad-spectrum contact herbicide for total weed control in wide range of sites including greenhouse, aquatic and others. PRODUCT IS DOT HAZMAT.					
<b>03135</b>	<b>Eraser Herbicide Foaming Spray 19 oz.</b>	<b>Glyphosate</b>	<b>EA</b>	<b>6</b>	<b>DNR</b>
Eraser Foaming Weed Killer contains glyphosate and pelargonic acid and related fatty acids; the same ingredients found in Roundup Sure Shot Foam. Eraser foaming weed killer is a convenient ready to use formula that is waterproof in just ten minutes after application. Kills weeds and Johnson Grass down to the root. Foam application allows you to see where you have sprayed and allows application to weeds located in tough places. WARNING! This product can expose you to chemicals including glyphosate which is known to the State of California to cause cancer. For more information go to <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .					
<b>03010</b>	<b>Finale Herbicide 2.5 Gallon</b>	<b>Glufosinate-ammonium 11.33%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Finale is a post emergence herbicide for non selective weed control of emerged weeds in noncrop areas. Effects of Finale will begin to show within 2-4 days of application. Thorough coverage is important to maximize control. Will not control weeds that have not emerged. Finale works best on weeds that are actively growing.					
<b>03303</b>	<b>Fireworxx Herbicide Gallon</b>	<b>Caprylic Acid 44.0%, Capric Acid 36.0%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
FireWorxx is an OMRI-Listed, fast-acting biological herbicide that is active against weeds, algae, and moss. Using a non-staining ammonium soap of fatty acids, FireWorxx is a non-selective herbicide that controls or suppresses many troublesome weeds such as bittercress, chickweed, groundsel, dandelions, oxalis, and grasses. FireWorxx is a great tool for greenhouses, nurseries, landscaped areas, flower gardens, around buildings and sidewalks, in gravel, and in other areas. Users should be aware not to spray on desirable plant materials. FireWorxx can be used in cooler weather conditions. Packaged in one-gallon containers in a 4 x 1 gal. case, FireWorxx has a 12 hour Restricted Entry Interval (REI) and a Caution Signal word.					
<b>03708</b>	<b>Fusilade II Herbicide Quart</b>	<b>Fluazifop-p-butylbutyl 24.5%</b>	<b>QT</b>	<b>8</b>	<b>STK</b>
For the Selective Control of Grass Weeds in Landscaped areas, Roadsides, Nurseries, Greenhouses, , Flower Beds, Groundcovers, Interiorscapes, Parks, Sports Fields, Golf Courses, Commercial & residential areas. A selective postemergent herbicide, Fusilade II turf and ornamental herbicide controls a long list of both perennial and annual grass weeds in a variety of turf and landscape areas. Extremely fast and effective, Fusilade II can be applied over-the-top or as a directed spray without damaging valuable ornamental plantings. It can also be used at reduced rates to safely remove Bermudagrass from tall fescue and zoysia grass.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. Please check with your local Extension Service to ensure registration status. ● **Product Type:** **STK**- Stock Item, **OAN**- Order as Needed (not stocked), **DNR**- Discontinued Item.

## CHEMICALS

## HERBICIDES

PC	Product	Description	Retail	UM	Pack	Type
03205	Gallery 75DF Herbicide 1 lb.	Isoxaben 75%			EA	4 STK
Gallery 75 dry flowable herbicide is a preemergence product for control of certain broadleaf weeds in established turf, landscape ornamentals, container grown ornamentals, and field grown ornamentals. Apply Gallery 75DF in late summer to early fall, early spring or anytime prior to the germination of target weeds or after cultivation.						
03206	Gallery SC Herbicide Quart	isoxaben 45.45%			EA	16 OAN
Gallery SC herbicide is a preemergence product for control of certain broadleaf weeds in established turf, landscape ornamentals, container grown ornamentals, and field grown ornamentals. Apply Gallery SC in late summer to early fall, early spring or anytime prior to the germination of target weeds or after cultivation.						
03423	Gemini 3.7SC Herbicide .5 gallon	Prodiamine 23.3%, Isoxaben 15.5%			EA	4 OAN
Gemini preemergent herbicide features a selective combination of two active ingredients: Prodiamine and Isoxaben (the same actives found in Barricade and Gallery). These two trusted active ingredients provide season long control of a wide variety grassy and broadleaf weeds. Labeled for use in both field and container nurseries and Christmas tree farms.						
03425	Gemini 3.7SC Herbicide 2.5 gallon	Prodiamine 23.3%, Isoxaben 15.5%			EA	2 STK
Gemini preemergent herbicide features a selective combination of two active ingredients: Prodiamine and Isoxaben (the same actives found in Barricade and Gallery). These two trusted active ingredients provide season long control of a wide variety grassy and broadleaf weeds. Labeled for use in both field and container nurseries and Christmas tree farms.						
03040	Glyphosate 5.4 Herbicide 2.5 gallon	Glyphosate 53.8%			EA	2 STK
Controls annual and perennial broadleaf weeds and grasses such as leafy spurge and cheat grass. For weed control and/or turf height suppression on non-cropland areas including range/pastureland, roadsides, rights-of-way.						
03905	Hi Yield Killzall SC Herbicide 2.5 Gallon	Glyphosate 41.0%			EA	2 STK
Killzall Super Concentrate is a post-emergent herbicide that controls broadleaf and most grassy weeds. No additional surfactant needed. Active Ingredient: Glyphosate.						
03709	Pennant Magnum Herbicide Gallon	S-metolachlor 83.7%			GL	4 OAN
Pennant Magnum pre emergent herbicide controls many annual grasses, certain broadleaf weeds, and yellow nutsedge. It is labeled for use on commercial and residential warm-season turfgrasses on non-crop land such as nurseries, sports fields and landscaped areas. Some of the weeds controlled include crabgrass, goosegrass, yellow nutsedge and pigweed.						
03710	Princep Liquid Herbicide 2.5 gallon	Simazine 41.9%			EA	2 OAN
Princep liquid is a pre-emergent herbicide for control of weeds in turf and ornamentals.						
03177	Quali-Pro Quinclorac 75 DF 1 lb.	Quinclorac 75%			BG	6 STK
Quinclorac 75 Df is a dependable post-emergent control of both broadleaf and grassy weeds in a wide variety of turf species from residential and commercial to golf courses, sports fields and sod farms. Use sites include commercial and residential turfgrass, golf courses, sports fields and sod farms. Effective control of crabgrass, clover, foxtail, dandelion, black medic, English daisy, dollarweed, barnyardgrass and others. Contains 75% quinclorac. Product is for professional use.						
03292	QuickPRO Roundup Herbicide 6.8 lb.	Glyphosate 73.3%, Diquat dibromide 2.9%			EA	4 STK
Roundup QuikPRO is a granular post emergent herbicide for turf and ornamental use. Quick acting.						
03280	Ranger Pro Herbicide 2.5 gallon	Glyphosate 41.0%			EA	2 STK
Ranger Pro is a complete broad spectrum postemergence herbicide for turf, industrial and ornamental weed control. 41% Glyphosate plus surfactant.						
03283-T	Ranger Pro Herbicide 30 gallon	Glyphosate 41.0%			EA	4 STK
Ranger Pro is a complete broad spectrum postemergence herbicide for turf, industrial and ornamental weed control. 41% Glyphosate plus surfactant.						
03715	Reward Herbicide Agency 2.5 gallon	Diquat dibromide 37.3%			EA	2 STK
Reward Landscape and Aquatic Herbicide is a nonvolatile herbicidal chemical for use as a general herbicide to control weeds in commercial greenhouses and nurseries; ornamental seed crops, landscape, industrial, recreational, commercial, residential, and public areas; turf renovation (all turf areas except commercial sod farms); dormant established turfgrass (bermudagrass, zoysiagrass); and aquatic areas. PRODUCT IS DOT HAZMAT.

## HERBICIDES

PC	Product	Description	Retail	UM	Pack	Type
03285	Roundup Promax Herbicide 1.67 Gal.	Glyphosate 48.7%		EA	2	STK
Roundup Pro Max is a post-emergent, systemic herbicide for use on non-crop, industrial, turf and ornamental applications. It gives control of many annual weeds, perennial weeds, woody brush and trees. Contains Glyphosate. It is formulated as a water-soluble liquid containing surfactant and no additional surfactant is needed or recommended.						
03295	Scythe Herbicide 2.5 gallon	Pelargonic Acid 57.0%, Related fatty acids 3.0%		EA	2	OAN
Scythe is used for control or burndown on a wide variety of weeds on contact. Best applied when weeds are actively growing.						
03904	SureGuard SC Herbicide 64 oz. STW	Flumioxazin 44.0%		EA	4	STK
Sureguard SC liquid is a selective herbicide for use on commercial and residential landscape ornamentals, dormant Bermudagrass on residential sites, golf courses, and sod farms, non-bearing fruit and nut trees and vines, and on non-crop areas and around buildings, fencerows, gravel surfaces, driveways, ground mats, and other similar sites outdoor. Sureguard SC is effective as a pre-emergent and/or post emergent herbicide on selected weeds. Flumioxazin (44%) Not registered for sale in California.						
03900	SureGuard SC Herbicide Pint STW	Flumioxazin 44.0%		EA	8	STK
Sureguard SC liquid is a selective herbicide for use on commercial and residential landscape ornamentals, dormant Bermudagrass on residential sites, golf courses, and sod farms, non-bearing fruit and nut trees and vines, and on non-crop areas and around buildings, fencerows, gravel surfaces, driveways, ground mats, and other similar sites outdoor. Sureguard SC is effective as a pre-emergent and/or post emergent herbicide on selected weeds. Flumioxazin (44%) Not registered for sale in California.						

## HERBICIDES - GRANULAR

Product	Description	Active Ingredient	UM	Pack	Type
03300	Biathlon Herbicide 50 lb. bag	Oxyfluorfen 2.00%, Prodiamine 0.75%	BG	40	STK
Biathlon is a pre-emergent granular herbicide for control of weeds in field and container production ornamentals, conifers and Christmas trees, grounds maintenance, and other label specified non-crop areas. Biathlon contains the active ingredients oxyfluorfen and prodiamine formulated on the Verge granule. Biathlon is a low-dust product.					
03901	BroadStar Herbicide 50 lb. STW	Flumioxazin 0.25%	BG	40	STK
Broadstar provides pre-emergent control of many broadleaf and grass weeds. Very effective against bittercress, spurge, and liverwort. Labeled for use on landscapes and outdoor ornamentals.					
03305	Fortress Herbicide STW 50 lb. Bag	Isoxaben 0.50%, Dithopyr 0.25%	BG	40	STK
Fortress is a pre-emergent granular herbicide for control of weeds in nursery containers and field grown ornamentals. Fortress controls a wide range of both grassy and broadleaf weeds by creating a barrier in the soil. See label for application rates.					
03008	Pendulum 2G Herbicide 40 lb. bag	Pendimethalin 2.0%	BG	50	OAN
Pendulum 2G herbicide consistently controls crabgrass better than other preemergent herbicides. Pendulum 2G controls an incredibly broad spectrum of weeds more than 40 grassy and broadleaf weeds in all including troublesome weeds like oxalis, henbit and spurge.					
03310	Fuerte Herbicide STW 50 lb. Bag	Flumioxazin 0.125%, Prodiamine 0.75%	BG	40	STK
Fuerte is a unique pre-emergent combination granular product that controls broadleaf and grassy weeds including hard-to-control weeds such as oxalis, spurge, and eclipta on trees, shrubs, conifers, and landscape ornamentals without harming desirable plant material. The dual active ingredients in Fuerte -- flumioxazin and prodiamine -- are natural partners that have a proven track record for excellent weed control and overall plant tolerance, and the power to provide weed control in the challenging summer months. See label for application rates.					
03430	Gemini Granular Herbicide 50 lb.	Prodiamine 0.40%, Isoxaben 0.25%	EA	40	STK
Gemini® Granular is a herbicide containing the active ingredient, prodiamine and isoxaben. The actives control susceptible weeds by preventing growth and development of newly germinated seeds. Each bag contains 0.325 pounds active ingredient (0.2 pounds prodiamine per bag plus 0.125 pounds isoxaben per bag). Gemini® Granular is used for pre-emergent control of listed grasses and broadleaf weeds. Weed control is most effective when Gemini® Granular is activated by at least 0.5 inches of rainfall or irrigation. Labeled for use on container, field-grown, and landscape ornamentals as well as Christmas tree farms.

Product	Description	Active Ingredient	UM	Pack	Type
<b>04318</b>	<b>Discus L Insecticide Gallon</b>	<b>Cyfluthrin 0.70%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Discus L Insecticide is a versatile, broad-spectrum product that gives long-term control of many insects. Discus L is safe on virtually all plant material, offering control of a wide range of insects. Discus L as a foliar application provides greater than 30 day control. Discus L can be applied as a drench, band or foliar application					
<b>04920</b>	<b>Distance Insect Growth Regulator Quart</b>	<b>Pyriproxyfen 11.23%</b>	<b>QT</b>	<b>4</b>	<b>OAN</b>
Distance Insect Growth Regulator (IGR) controls whiteflies, scale, shore flies and fungus gnats in indoor (including interiorscapes) and outdoor ornamentals. Distance will not control adults stages.					
<b>04265</b>	<b>Dominion 2L Insecticide 27.5 oz</b>	<b>Imidacloprid 21.4%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Dominion 2L is a termiticide/insecticide for control of subterranean termites. It contains two pounds of Imidacloprid per gallon. Dominion 2L creates a non-detectable barrier around structures, which helps aid in controlling the colony. Labeled for pre- and post-construction uses. Now with Exterior Perimeter/Interior Spot Treatment applications (EP/IST). Product Type: Professional. Use Sites: pre- and post-construction, turf and ornamentals. Effective Against: termites, ants, beetles, billbugs, chinch bugs, mole crickets. Active Ingredients: Imidacloprid 21.4%. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04150</b>	<b>Ecotec Oil 2.5 gal</b>	<b>Rosemary Oil 10.00%, Peppermint Oil 2.00%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Ecotec is a unique insecticide/miticide with two modes of action. Derived from a patented blend of non-hazardous botanical oils, Ecotec provides maximum control of insects with a minimum of environmental or human impact. An emulsifiable concentrate, Ecotec will provide comparable results to that of conventional chemicals with virtually none of the hazards. Ecotec is labeled for most agricultural, ornamental and turf crops and pests. Consult the product label for specific crop, pest and application information. OMRI Listed.					
<b>04727</b>	<b>Endeavor Insecticide 15 oz. USP</b>	<b>Pymetrozine</b>	<b>EA</b>	<b>8</b>	<b>STK</b>
Endeavor® insecticide belongs to a unique class of chemistry that eliminates aphids and whiteflies. It provides residual control by quickly inhibiting insect feeding. Endeavor is highly compatible with beneficial insects, making it an ideal tool for integrated pest management (IPM) programs in the greenhouse and nursery. Active Ingredients: Pymetrozine HRAC/FRAC/IRAC Classification: Group 9B Insecticide EPA#:100-913					
<b>04886</b>	<b>Enstar AQ Insect Growth Regulator Qt.</b>	<b>S-Kinoprene 65.1%</b>	<b>QT</b>	<b>6</b>	<b>STK</b>
Enstar AQ is an insect growth regulator for control of whiteflies, thrips, aphids, soft-bodied and armored scales, mealybugs, leafminers, glass winged sharpshooters and fungus gnats. Labeled for use on ornamental plants in shadehouses, greenhouses, lath houses and interior scapes.					
<b>04280</b>	<b>Entrust 80W Insecticide 4 x 4 oz.</b>	<b>Spinosad 80%</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
Spinosad, the active ingredient in Entrust Naturallyte insect control, is a revolutionary compound for insect control that provides the efficacy of a syntheticinsecticide with environmental benefits of most biological insecticides. It offers excellent control of targeted pests and low toxicity to non-target organisms, including most beneficial insects. Entrust controls targeted insects in a wide array of crops, including cole crops, corn, cucurbits, fruiting and leafy vegetables, pome fruits, potatoes, stone fruits, strawberries, bushberries and cranberries.					
<b>04887</b>	<b>Extinguish Plus Fire Ant Bait 25 lb. Bag</b>	<b>Hydramethylnon 0.365%, S-Methoprene 0.250%</b>	<b>BG</b>	<b>1</b>	<b>STK</b>
Extinguish Plus offers a two pronged attack through its combination of Hydramethylnon and S-Methoprene. The adulticide in Extinguish Plus starts killing worker-fire ants immediately after ingestion and the IGR prevents the queen from laying fertile eggs. The result is a one-two punch for fire ants, quick reduction of mounds and the confidence that the ants will be completely extinguished through the IGR. Extinguish Plus can be used indoor and outdoor use for residential and commercial property, container or nursery stock, sod farms, commercial turf and more.					
<b>04732</b>	<b>Flagship 25 WG Insecticide Agency 2 lb.</b>	<b>Thiamethoxam 25.0%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Flagship 25 WG is for foliar and systemic control of insect pests on ornamental plants grown in greenhouses, lath and shadehouses, containers, field nurseries (including non-bearing fruit and nut trees) and on Christmas trees.					
<b>04321</b>	<b>Floramite SC Insecticide STW Quart</b>	<b>Bifenthrin 22.6%</b>	<b>QT</b>	<b>8</b>	<b>STK</b>
Floramite SC Miticide provides outstanding control of a variety of mite pests on ornamentals plants in greenhouse, shadehouse, nursery, field, landscape and interiorscapes settings. Labeled for use on: All ornamental plants, including bedding plants, flowering plants, foliage plants, bulb crops, perennials, trees and shrubs. All non-bearing fruit trees and greenhouse tomatoes. Mites Controlled: Variety of spider mites and all life stages of Tetranychid mites.

## INSECTICIDES / MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>04325</b>	<b>Marathon 1G Insecticide 50 lb.</b>	<b>Imidacloprid 1.0%</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
Marathon 1% G is a highly-active insecticide that demonstrates systemic activity in plants when applied to the soil surface or incorporated into the media. It offers up to 12 weeks of residual control on ornamentals plants for resale grown in the greenhouse or nursery. Labeled for use on: Ornamentals grown in the greenhouse or nursery. Insects Controlled: Aphids, whiteflies, thrips, mealybugs, soft scale.					
<b>04335</b>	<b>Marathon II Insecticide 250ml</b>	<b>Imidacloprid 21.4%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Marathon II is a flowable formulation that allows for a foliar spray application on ornamentals and vegetable plants for resale grown in the greenhouse or nursery. With very low rates Marathon II as a spray offers 3-4 weeks of control on sucking and piercing insects (aphids, whiteflies, and thrips). Labeled for use on: Ornamentals, fruit and nut trees, and vegetables plants in greenhouses, nurseries and interior landscapes. Insects Controlled: Aphids, whiteflies, thrips, mealybugs, soft scale.					
<b>04890</b>	<b>Mavrik Aquaflow Miticide Quart</b>	<b>Tau-fluvalinate 22.3%</b>	<b>QT</b>	<b>12</b>	<b>STK</b>
Mavrik Aquaflow controls insects and suppresses or controls mite pests when used at labeled rates. Mavrik works primarily through contact. Good spray coverage is necessary. Labeled for indoor and outdoor uses. Controls a wide variety of pests including whiteflies, aphids, thrips and mites.					
<b>04005</b>	<b>Metaldehyde 7.5G Insecticide 50 lb.</b>	<b>Metaldehyde 7.5%</b>	<b>BG</b>	<b>50</b>	<b>STK</b>
Metaldehyde Granules 7.5% is used as a soil surface treatment for control of snails and slugs in and around ornamental greenhouses as well as turf. Water area to be treated before treatment. Do not water again for 48 hours.					
<b>04298</b>	<b>Minx Insecticide Gallon</b>	<b>Abamectin 2.0%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Minx Insecticide/Miticide offers reliable, long-lasting control of mites and leafminers, along with suppression of aphids, thrips and whiteflies. Minx affects pests within hours of exposure. Feeding and damage stops within hours; targeted pests die within two to four days. And, selective chemistry makes it a suitable rotation partner for resistance management and beneficial release programs. Active Ingredient: Abamectin. Labeled for use in shadehouse, greenhouses, field-grown ornamentals, foliage plants, Christmas trees and other woody ornamentals.					
<b>04297</b>	<b>Minx Insecticide Quart</b>	<b>Abamectin 2.0%</b>	<b>QT</b>	<b>4</b>	<b>STK</b>
Minx Insecticide/Miticide offers reliable, long-lasting control of mites and leafminers, along with suppression of aphids, thrips and whiteflies. Minx affects pests within hours of exposure. Feeding and damage stops within hours; targeted pests die within two to four days. And, selective chemistry makes it a suitable rotation partner for resistance management and beneficial release programs. Active Ingredient: Abamectin. Labeled for use in shadehouse, greenhouses, field-grown ornamentals, foliage plants, Christmas trees and other woody ornamentals.					
<b>04287</b>	<b>M-Pede Insecticide 2.5 gallon</b>	<b>Potassium salts of fatty acids 49.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
M-Pede insecticide/fungicide is an effective contact insecticide, miticide and fungicide for control of soft-bodied insects, mites and powdery mildew. The formulation is based on potassium salts of naturally derived fatty acids that have been optimized for insect activity. This product may be used to control targeted pests on crops which include vegetables, grapes and other small fruits, tree fruits, tree nuts, cotton, tobacco, shrubs, shade and ornamental trees, turf, foliage an flowering plants growing outdoors, in greenhouses and in interiorscapes. OMRI listed.					
<b>04307</b>	<b>Notavo Ovicide/Miticide STW Pint</b>	<b>Clofentezine</b>	<b>EA</b>	<b>8</b>	<b>STK</b>
Notavo Ovicide/Miticide is highly effective at controlling eggs and early instar mite stages. As a selective ovicide it is a critical part of any spider mite control program. Applause may be used for mite management on commercial ornamental plants grown in greenhouses, saran and shade houses, outdoor containers, and field-grown nursery stock. Controls two spotted spider mite, Pacific spider mite, McDaniel spider mite, European red mite, and Yellow spider mite. NOT FOR RESIDENTIAL USE.					
<b>04926</b>	<b>Orthene TT&amp;O Spray 97 .773lb</b>	<b>Acephate 97.4%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Orthene is a broad spectrum insecticide that controls pests such as aphids, thrips, fire-ants and many others. Orthene Turf, Tree & Ornamental Spray 97 is a pelletized product featuring less dust and odor.					
<b>04924</b>	<b>Overture 35WP 8 x 2 oz</b>	<b>Pyridalyl 35%</b>	<b>EA</b>	<b>8</b>	<b>STK</b>
Overture Insecticide contains the active ingredient pyridalyl, a new generation insecticide for use on indoor ornamentals that provides quicker knockdown of nymph and adult thrips while also controlling lepidopterous insects. It offers fast and effective residual control of western flower thrips. Overture has a new mode of action for resistance managment and does not significantly impact most natural beneficial insects, including ladybird beetles, lacewings and predatory bugs.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. ## INSECTICIDES / MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>04340</b>	<b>Pedestal IGR Quart</b>	<b>Novaluron 10.0%</b>	<b>QT</b>	<b>8</b>	<b>OAN</b>
Pedestal is an insect growth regulator (IGR) effective in control of a variety of insect pests on ornamental plants. Labeled for use on: Control of insect pests on container and field grown ornamentals in greenhouses, shadehouses, and nurseries. Insects Controlled: Larval, nymph or immature stages of thrips, whiteflies, armyworms and suppression of leafminers. Non Stock Item					
<b>04268</b>	<b>Permethrin SFR Pint</b>	<b>Permethrin 36.8%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Permethrin SFR is a broad-use professional strength termiticide/insecticide. Labeled for both pre and post-construction termite applications. Can be used on lawns, landscapes, ornamentals, around homes, sheds and barns on a variety of insects. Safe for use in and around animal housing, including poultry houses, and on listed animals Product Type: Professional. Use Sites: pre- and post-construction termite, lawns, landscapes, ornamentals, around homes, sheds and barns, in and around animal housing, including poultry houses, and on listed animals. Effective Against: ants, bees, beetles, boxelder bugs, cockroaches, crickets, earwigs, flies, millipedes, mole crickets, pillbugs, scorpions, silverfish, spiders, ticks, termites, wasps. States Registered: AL, AR, AZ, CA, CO, CT, DE, FL, GA, HI, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04341</b>	<b>Pradia Insecticide STW Quart</b>	<b>Cyclaniliprole 4.46%, Fonicamid 5.96%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Pradia Insecticide is a combination of two unique insecticides providing both contact and systemic activity. Pradia contains cyclaniliprole and fonicamid in a soluble concentrate formulation for use as a foliar spray. Pradia delivers a quick knockdown (48 hours) and excellent long-term control of 3 to 4 weeks of residual activity on problem insects such as aphids, thrips and whiteflies.					
<b>04342</b>	<b>Pycana Insecticide OMRI Gallon</b>	<b>Pyrethrins and Canola Oil</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Pycana is a unique combination product containing natural pyrethrins and canola oil that provides quick knockdown of many insects and mites including aphids, thrips, whiteflies, spider mites, leafhoppers, fungus gnats, plant bugs, psyllids, mealybugs and more. Labeled for ornamentals, fruits, vegetables and herbs, Pycana gives ornamental and specialty growers another tool to fight off pesky insects and mites in greenhouses, shadehouses, hoopouses and container nurseries.					
<b>04154</b>	<b>Pyganic EC Insecticide II Gallon</b>	<b>Pyrethrins 1.40%</b>	<b>GL</b>	<b>2</b>	<b>OAN</b>
PyGanic Crop Protection EC 5.0 II offers immediate insect control for organic production. PyGanic Crop Protection is an organically-compliant, broad-spectrum contact insecticide that stops damage fast on a wide variety of crops. It provides quick knockdown and control. PyGanic is OMRI listed.					
<b>04345</b>	<b>Pylon Miticide-Insecticide 16 oz.</b>	<b>Chlorfenapyr 4.5%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Pylon offers contact control as well as long residual control (21-27 days). Labeled for use on: ornamental, vegetable and herb crops grown in the greenhouse, and interiorscapes. Pylon gives excellent control of most mite species (including:two-spotted spider mite, apple rust mite, broad mite, carmine spider mite, citrus budmite, citrus rust mite, cyclamen mite, pear rust mite, and the Pacific spider mite.) Mites/Insects Controlled: Pylon is effective on a broad range of mites, foliar nematodes, fungus gnats, caterpillars, and thrips.					
<b>04960</b>	<b>Pylon TR 12 x 2 oz.</b>	<b>Chlorfenapyr 4.5%</b>	<b>CS</b>	<b>1</b>	<b>STK</b>
Pylon TR total release insecticide provides control of mites, thrips and adult fungus gnats. It is labeled for use on ornamental crops and fruiting vegetables grown in commercial greenhouses. It also may be used on bedding plants, cut flowers, flowering hanging baskets, foliage, fruiting vegetables, potted flowering plants and ornamentals.					
<b>04987</b>	<b>Pyrethrum TR Micro Insecticide 12 x 2 oz.</b>	<b>Pyrethrins 4.0%, Piperonyl Butoxide 16.0%</b>	<b>CS</b>	<b>1</b>	<b>STK</b>
Pyrethrum TR is a ready-to-use, ultra low volume insecticide fogger. It effectively controls aphids, fungus gnats, mites and whiteflies, along with numerous other secondary insect pests. Pyrethrum TR is used as an early rotational insecticide and is labeled for use on ornamentals, herbs and vegetables. Product is for commercial agricultural use. Not for retail sale.					
<b>04545</b>	<b>Rycar Insecticide 8 oz. Agency</b>	<b>Pyrifluquinazon 20.0%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Rycar insecticide controls aphids, whiteflies, mealybugs, leafhoppers and others. Labeled for indoor greenhouse use on ornamental crops.					
<b>04927</b>	<b>Safari 20 SG Insecticide 3 lb. STW</b>	<b>Dinotefuran 20%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Safari Insecticide, a new generation, super-systemic insecticide with quick uptake and knockdown, controls a broad spectrum of ferocious and invasive pests, including Q- and B-biotype whitefly, mealybug, leafminer, fungus gnat, black vine weevil, glassywinged sharpshooter, armored and soft scale, adelgid and lacebug some of the most costly pests that affect high value greenhouse and nursery crops such as poinsettia and hibiscus, as well as trees, shrubs and herbaceous ornamentals in the lawn and landscape market.

## INSECTICIDES / MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>04430</b>	<b>Sanmite SC Miticide Quart</b>	<b>Pyridaben 42.47%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Sanmite controls mites, whiteflies and mealybugs on ornamental plants, flowers, and foliage crops. Sanmite provides excellent knock-down and residual control. Results can be seen in as little as 4-7 days. Sanmite works primarily through contact so thorough spray coverage is important. Do not use Sanmite in successive applications. Rotate with other chemistries to minimize insect resistance. DOT Hazmat material. PRODUCT IS DOT HAZMAT.					
<b>04348</b>	<b>Sarisa Insecticide 0.5 gallon STW</b>	<b>Cyclaniliprole 4.55%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Sarisa Insecticide contains a novel active ingredient, cyclaniliprole, formulated as a soluble concentrate that acts on contact and ingestion. Sarisa provides quick knockdown (48 hours) of target pests with residual control of 3 to 4 weeks on thrips, caterpillars, and beetles (including flea and Japanese beetles), along with other sucking and chewing insects. Cyclaniliprole.					
<b>04803</b>	<b>Sevin SL Insecticide 2.5 Gallon</b>	<b>Carbarryl 43.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Sevin effectively controls over 60 pests on Ornamentals, Lawns, Vegetables, Pasture, Peanuts, Tobacco, Mosquito Control, Tree fruit, Nut Crops, and Small Fruit. DOT Hazmat material.					
<b>04350</b>	<b>Shuttle O Miticide Pint</b>	<b>Acequinocyl 15.8%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Because of its unique chemical class, Shuttle O is an excellent choice as a rotational tool for control of mites. Labeled for use on: Greenhouse, shadehouse, and field grown ornamental, floral, foliage, and nursery crops, and interiorscapes. Mites controlled: two spotted spider mite, spruce spider mites, citrus red mite, European red mite, Pacific spider mite, Willamette spider mite, Strawberry spider mite, Texas citrus mite.					
<b>04097</b>	<b>Siesta Fire Ant Bait 15 lb.</b>	<b>Metaflumizone 0.063%</b>	<b>BG</b>	<b>1</b>	<b>OAN</b>
which is toxic to mosquito larvae. Kills larvae of mosquitos that may transmit Zika, West Nile, Dengue, Chikungunya and Yellow Fever. 20 briquets per card.					
<b>04355</b>	<b>Sirocco Miticide 8 oz.</b>	<b>Bifenazate 43.2%, Abamectin 2.2%</b>	<b>EA</b>	<b>8</b>	<b>OAN</b>
Sirocco provides quick knockdown and long residual control of a wide variety of insects and pests such as thrips and mites. Sirocco may be used in greenhouse, shadehouses, nurseries (including Christmas tree/conifer plantations), landscapes and interiorscapes.					
<b>04030</b>	<b>Summit BTI Mosquito Briquets 20/cards</b>	<b>Bacillus thuringiensis israelensis</b>	<b>BG</b>	<b>5</b>	<b>STK</b>
Drop briquets into standing water or potential breeding sites. As they slowly dissolve, they release a bacterium which is toxic to mosquito larvae. Kills larvae of mosquitos that may transmit Zika, West Nile, Dengue, Chikungunya and Yellow Fever. 20 briquets per card.					
<b>04295</b>	<b>Talstar N Granular 50 lb.</b>	<b>Bifenthrin 0.2%</b>	<b>BG</b>	<b>48</b>	<b>STK</b>
Talstar Nursery Granular is for soil incorporation into potting media used for containerized plantings of woody ornamentals. Used as part of quarantine against imported fire ants.					
<b>04290</b>	<b>Talstar Professional Qt.</b>	<b>Bifenthrin 7.9%</b>	<b>QT</b>	<b>16</b>	<b>STK</b>
Talstar Professional controls a wide spectrum of pests, including ants, termites, cockroaches, spiders, bed bugs, fleas and ticks. Over 75 different pests. With its flexible label, Talstar Professional is approved in multiple use-sites, so you can use it almost anywhere: indoors and out, in industrial, commercial and food-handling areas. Active ingredient: 7.9% Bifenthrin.					
<b>04530</b>	<b>Talus 70DF Insect Growth Regulator 3 lb.</b>	<b>Buprofezin 70.0%</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
Talus 70 DF offers several benefits for the ornamental producer including a unique IGR mode of action, a broad label, outstanding crop safety, and safety to beneficial insects. Talus is also broadly labeled for applications in greenhouse tomatoes; ornamental plants in greenhouses, lath & shadehouses, nurseries, landscape ornamentals, ground covers, field & container-grown ornamentals; nonbearing fruit & nut trees & vines in nurseries, and Christmas trees.					
<b>04935</b>	<b>TetraSan 5 WDG Miticide 8 x 2 oz. STW</b>	<b>Etoxazole 5%</b>	<b>BG</b>	<b>8</b>	<b>STK</b>
Tetrasan 5WDG Miticide/Ovicide controls major tetranychid mite species in egg and nymph stages of growth. Foliar application can be made for control of spider mites infesting indoor (including interiorscapes) and outdoor ornamentals.					
<b>04160</b>	<b>Tri Tek Oil 2.5 gallon</b>	<b>Mineral Oil 80.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
TriTek is a smothering oil, produced using only the highest quality Narrow Range oil providing optimal pesticidal efficacy, durability, and minimal hazard. TriTek is a unique concentrate of pre-emulsified highly refined, high paraffin, low aromatic oil and nothing else, ideal for safe and effective pest and disease control in a broad range of crops and ornamentals. TriTek's mode of action is primarily through the suffocation of eggs, larvae, nymphs and adults of soft bodied insects.

Product	Description	Active Ingredient	UM	Pack	Type
<b>05920-T</b>	<b>Green-Shield II Disinfectant 30 gallon</b>	<b>Quaternary Ammonium Compounds</b>	<b>DR</b>	<b>1</b>	<b>OAN</b>
Green-Shield II Disinfectant & Algicide is a simple but cost effective way to control unwanted plant pathogens and algae. It is the first step in a successful disease management program. Labeled for use in Greenhouses, Nurseries, Landscapes and Interiorscapes on work areas, benches, tools, containers, walkways, floors and evaporative cooling pads. Unlike bleach, Green-Shield II is EPA-registered for broad-spectrum control of pathogens and algae in and around greenhouses and causes no damage to clothing from splashes. Green-Shield II lasts four times longer in solution than bleach and provides residual control as long as treated surfaces stay wet, without bleach's odor, irritation and volatility. One gallon of Green-Shield II is equivalent to 28 gallons of bleach. Green-Shield II is labeled for use in greenhouses, nurseries, landscapes and interiorscapes on work areas, benches, tools, containers, walkways, floors and evaporative cooling pads. Green-Shield II controls fungal, bacterial and viral plant pathogens and algae. Green-Shield is not labeled for use in California. PRODUCT IS DOT HAZMAT.					
<b>05915</b>	<b>Green-Shield II Disinfectant Gallon</b>	<b>Quaternary Ammonium Compounds</b>	<b>GL</b>	<b>4</b>	<b>STK</b>

<b>05050</b>	<b>Indicate 5 Adjuvant Gallon</b>	<b>Blend of Alkyl Aryl Ethoxylates &amp; Water 80%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Patented INDICATE 5 is the only adjuvant that contains a built in pH indicator, turning the spray water pink as soon as the optimum level of 4.5-5.5 is reached. It eliminates the need to test the water pH with any additional equipment. INDICATE 5 counters both the detrimental effects of high pH and hard water on sensitive pesticides. Chemicals sensitive to alkaline hydrolysis include: Glyphosate, Organo Phosphates, Synthetic Pyrethroids, Carbamates, Chlorinated Hydrocarbons, Triazines and others. INDICATE 5 acts as a wetting, spreading and penetrating agent resulting in an even film of spray over the leaf and better pesticide performance.					
<b>05055</b>	<b>Insure Wetter/Spreader 2.5 ga</b>	<b>Alkyl Aryl Polyther Phosphate, Organo Phosphates, water 80.0%</b>	<b>EA</b>	<b>2</b>	<b>OAN</b>
INSURE enhances the performance and consistency of post emergent herbicides by reducing or eliminating the tie-up of anionic herbicides including glyphosate and amine salt herbicides with metal cations presence in hard water such as Calcium (Ca), Magnesium (Mg) and Iron (Fe). INSURE also increases compatibility of micronutrient tank mixes such as Manganese (Mn) with glyphosate and other anionic herbicide that are deactivated by metal cations. INSURE contains ammonium ions for improved herbicide uptake and translocation in difficult to control weeds. INSURE applied at a rate of 2 pints per 100 gallons is typically sufficient to lower the pH of the spray solution to approximately 4.5 - 5.5, extremely alkaline and hard water may require additional amounts. INSURE is buffered and will not lower the pH of the tank solution below 4.0. INSURE has some capabilities as a buffer and as wetter spreader.					
<b>05115</b>	<b>Nu-Film P Spreader/Sticker Gallon</b>	<b>Pinene Polymers, Petrolatum, alkyl amine ethoxylate 100.%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
NU-FILM P is a superior STICKING agent designed for use with all pesticides. It is compatible in the spray tank with all commercially used pesticide products and soluble fertilizers. NU-FILM P forms a sticky, elastic film which tenaciously holds the pesticide on the crop foliage and greatly reduces rainfall and overhead irrigation erosion of the spray residue. It will withstand about 1 inch of rainfall for seven to ten days, thus insuring that pesticide sprays are not lost shortly after application. Apply at least one hour, during daylight, before an anticipated rain.					
<b>05018</b>	<b>Selontra Rodent Bait 8 lb. Pail</b>	<b>Cholecalciferol</b>	<b>EA</b>	<b>1</b>	<b>STK</b>
Selontra rodent bait delivers real efficiency for your business. It controls entire infestations in just seven days, which lowers both your labor and material costs. Its shortened baiting program requires less bait, and the stop-feed action of the active ingredient, cholecalciferol, makes a little go a long way: rodents eat only enough for a lethal dose, leaving more for the rest of the colony. Selontra rodent bait is effective against anticoagulant-resistant rodents, and it demonstrates proven palatability even when desirable food sources are available. And with a durability that holds up in tough conditions, rodent bait creates less waste, so it takes care of business while making yours more efficient. Selontra rodent bait offers three major advantages to your business:— Fast colony kill: Controls infestations in seven days in U.S. field trials— Efficient use of bait: Allows for shorter baiting programs, less bait to kill populations, and reduced waste— Effective resistance management: Kills anticoagulant resistant rodents.

<b>05120</b>	<b>Spray-Aide Surfactant Gallon</b>	<b>Olyethylene glycol alkyl ether phosphate &amp; potassium salts 75%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Spray-Aide is a concentrated compatibility-acidifying-surfactant agent designed to improve spray tank compatibility of pesticides, to lower the pH of spray tank water or liquid fertilizer solutions, as a spreader for use with pesticides and to reduce soil crusting. Can also be used as a tank cleaner and sprinkler/drip line cleaning agent.					
<b>05060</b>	<b>Super 7 Non Ionic Surfactant Gallon</b>	<b>Alcohol ethoxylate, lecithin and propanoic acid 82.5%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
SUPER 7 is a non-ionic, low foam surfactant that enhances the activity and effectiveness of pesticides and foliar nutrients. SUPER 7 provides more uniform coverage by decreasing surface tension of spray solutions, thus aiding in penetration. It may be used as an acidifying agent to lower pH of spray solutions, thus preventing alkaline hydrolysis of pesticides sensitive to high pH. SUPER 7 may be used on agricultural, aquatic, forestry, turf and ornamental, industrial, structural and non-cropland sites.					
<b>05009</b>	<b>Turf Mark Blue Spray Indicator 2.5 gallon</b>		<b>EA</b>	<b>2</b>	<b>STK</b>
Turf Mark takes the guesswork out of spraying! It's the proven and professional way to apply liquid pesticides and fertilizers. Turf Mark dissipates quickly in either wet or dry weather, making it the ideal temporary spray colorant. The distinctive color shows you exactly where you've sprayed, preventing skips and overlaps and helping to pinpoint drift. Turf Mark makes spray applications virtually foolproof. You'll save time and money.					
<b>05007</b>	<b>Turf Mark Blue Spray Indicator Quart</b>		<b>QT</b>	<b>12</b>	<b>STK</b>
Turf Mark takes the guesswork out of spraying! It's the proven and professional way to apply liquid pesticides and fertilizers. Turf Mark dissipates quickly in either wet or dry weather, making it the ideal temporary spray colorant. The distinctive color shows you exactly where you've sprayed, preventing skips and overlaps and helping to pinpoint drift. Turf Mark makes spray applications virtually foolproof. You'll save time and money.					
<b>05065</b>	<b>Ultra 90-NF Surfactant 2.5 gallon</b>		<b>EA</b>	<b>2</b>	<b>OAN</b>
<b>Alkyl phenol ethoxylate, Polyethylene glycol, Isopropanol, and Polydimethylsiloxane 90%</b> - ULTRA 90-NF is a non-ionic surfactant containing an anti-foaming agent. It improves wetting of foliage and enhances the effectiveness of spray applications. It will not cause excessive foaming in the spray tank nor corrode equipment. ULTRA 90-NF may be used on agricultural, aquatic, forestry, turf and ornamental, industrial, structural and non-cropland sites. NOT FOR AQUATIC USE IN WASHINGTON.					
<b>05125</b>	<b>Vapor Gard Anti Transpirant Gallon</b>	<b>Di-1-p-Menthene 96%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Vapor Gard is a water emulsifiable organic concentrate for use on plants to reduce water transpiration. The soft, flexible film formed after the spray application dries, will significantly reduce moisture lost by the plant foliage. All anti-transpirant spray applications must be applied for full coverage. Apply Vapor Gard at least one hour, during daylight, before an anticipated rain. Vapor Gard also beautifies plants by polishing leaf surfaces.					
<b>05505</b>	<b>Xeroton-3 Bactericide 3 Qt.</b>	<b>Hydrogen Peroxide 6.9%, Peroxyacetic Acid 4.4%, Octanoic Acid 3.3%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Xeroton 3 is a multi-use product. Xeroton 3 is used for general sanitation, water treatment, mist propagation and other uses. Check the <a href="http://www.xeroton3.com">www.xeroton3.com</a> link for more information. Contains hydrogen peroxide. PRODUCT IS DOT HAZMAT.

## ROOTING COMPOUNDS

Product	Description	Active Ingredient	UM	Pack	Type
06010	Dip'N Grow Liquid 16 oz.	Indole-3-Butyric Acid, Naphthalene Acetic Acid, Ethyl Alcohol, Isopropyl Alcohol	EA	12	STK
Dip 'N Grow is an effective rooting hormones. Dip 'N Grow is a liquid concentrate that is easily diluted with water to the necessary strength.					
06005	Dip'N Grow Liquid 2 oz.	Indole-3-Butyric Acid, Naphthalene Acetic Acid, Ethyl Alcohol, Isopropyl Alcohol	EA	12	STK
Dip 'N Grow is an effective rooting hormones. Dip 'N Grow is a liquid concentrate that is easily diluted with water to the necessary strength.					
06015	Dip'N Grow Liquid Gallon	Indole-3-Butyric Acid, Naphthalene Acetic Acid, Ethyl Alcohol, Isopropyl Alcohol	GL	4	STK
Dip 'N Grow is an effective rooting hormones. Dip 'N Grow is a liquid concentrate that is easily diluted with water to the necessary strength. PRODUCT IS DOT HAZMAT.					
06305	Hormodin 1 Powder 1 lb.	Indole-3-butyric Acid 00.1%	EA	12	STK
Hormodin is a root inducing substance. Hormodin is a formulation of indole-3-butyric acid (IBA). IBA is a synthetic auxin rooting hormone, which acts as a root stimulant. Hormodin enhances root growth, which reduces bench time and plant loss. Hormodin is easy to use, yielding steadfast performance and zero disease migration. Hormodin 1 is a general purpose powder designed for the home gardener or commercial grower who propagates plants such as roses, carnations, poinsettias, some shrubs and most home garden and greenhouse plants. Labeled for use on: Ornamentals grown in commercial or research greenhouses, shadehouses, and nurseries.					
06310	Hormodin 2 Powder 1 lb.	Indole-3-butyric Acid 00.3%	EA	12	STK
Hormodin is a root inducing substance. Hormodin is a formulation of indole-3-butyric acid (IBA). IBA is a synthetic auxin rooting hormone, which acts as a root stimulant. Hormodin enhances root growth, which reduces bench time and plant loss. Hormodin is easy to use, yielding steadfast performance and zero disease migration. Hormodin 2 is prepared specially for propagating many woody and semi-woody plants, including some of the evergreens.					
06315	Hormodin 3 Powder 8 oz.	Indole-3-butyric Acid 00.8%	EA	12	STK
Hormodin is a root inducing substance. Hormodin is a formulation of indole-3-butyric acid (IBA). IBA is a synthetic auxin rooting hormone, which acts as a root stimulant. Hormodin enhances root growth, which reduces bench time and plant loss. Hormodin is easy to use, yielding steadfast performance and zero disease migration. Hormodin 3 is prepared specially for propagating the more difficult to root varieties, including many of the evergreens and dormant leafless cuttings.					

## WETTING AGENTS/WATER SAVING PRODUCTS

Product	Description	Active Ingredient	UM	Pack	Type
07505	H2Pro GN Wetting Agent 2.5 gallon	Alcohols, C6-12, ethoxylated 1-10%, Propane-1,2-diol, propoxylated .5-3%	EA	2	STK
H2Pro is a residual wetting agent that remains in the media to allow water to re-wet the particles. Stable in growing media in storage. Excellent initial wetting and long term wetting. Flexible, compatible and easy to use. Rates 5.5 fl.oz. to 16 fl.oz. per 100 gallons of water. Activity from 6 weeks to 12 months based on rate used. Can be soil incorporated or used at 5 ppm rate with every watering.					
07510	H2Pro GN Wetting Agent 22 lb.		EA	60	STK
Trade Secret H2Pro Granule is a blend of surfactants with a multi-matrix effect that allows easy re-wetting of soil particles. Longevity depends on rate. From 6 to 12 months. Rates 13.5 oz. to 27 oz. per cubic yard. Can also be top-dressed at a rate of 2 teaspoons per 1 gallon container.					

## RESTRICTED USE CHEMICAL PRODUCTS

Product	Description	Active Ingredient	UM	Pack	Type
09022	2,4-D Amine Herbicide (RUP)	Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 47.2%	BG	1	STK
For control of many broadleaf weeds and brush control in corn (field, pop and sweet), sorghum (Milo), soybeans (preplant), small grains (barley, millet,oats, rye, wheat), rice, sugarcane, fallow land, grasses, stone fruits and nutorchards, brush control, pastures, rangelands, forest management and in noncrop areas such as lawns and ornamental turf, drainage ditchbanks, fence rows and rights-of-way. Also for aquatic weed control, control of trees by injection, and tank mixes. ACTIVE INGREDIENT:Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 47.2%. State Restricted Use Pesticide. Applicators license required to purchase.

## RESTRICTED USE CHEMICAL PRODUCTS

Product	Description	Active Ingredient	UM	Pack	Type
<b>09435</b>	<b>DuraGuard ME Gallon (RUP)</b>	<b>Chlorpyrifos 20.0%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
DuraGuard ME is a timed-release solution for 21st century pest control. Microencapsulated DuraGuard offers the advantage of a highly pure active ingredient encased in a tiny protective permeable capsule. Labeled for use in Commercial Ornamental Greenhouses and Nurseries and outdoor industrial plant sites. DuraGuard ME controls aphids, fungus gnats and fungus gnat larvae, mealybugs, scale, shore flies and thrips. DuraGuard ME is a restricted use pesticide. Proper licensing required to purchase. DOT Hazmat material. Restricted Use Pesticide. Applicators license required to purchase. PRODUCT IS DOT HAZMAT.					
<b>09440</b>	<b>Mesuro 75WP 2 lb (RUP)</b>	<b>Methiocarb 75%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Mesuro 75-W is a time tested insecticide/molluscicide for nursery and greenhouse ornamentals. Mesuro acts on contact providing effective control of western flower thrips and broad spectrum control of terrestrial slugs and snails. Activity is not affected by low temperatures or high moisture environments. Mesuro offers effective reliable long residual control. Restricted use pesticide. License required to purchase. Restricted Use Pesticide. Applicators license required to purchase. PRODUCT IS DOT HAZMAT.					
<b>09415</b>	<b>Quali-Pro Chlorpyrifos 4E 2.5 gallon (RUP)</b>	<b>Chlorpyrifos 42.5%</b>	<b>EA</b>	<b>2</b>	<b>DNR</b>
Broad spectrum restricted use insecticide for commercial nursery and greenhouse. For use on golf course turf, industrial turf and ornamentals. Proven control of hundreds of insect pests, including ants, borers, cutworms, fall webworms, gypsy moths, leaf feeding beetles and mole crickets. Delivers long-lasting control. Stops pest feeding by inhibiting nervous system activity. Labeled for use on ornamentals and turf on golf courses, and a wide variety of outdoor and nursery-grown ornamentals. Product Type: Professional Use Sites: Nursery, Greenhouse, Trees, Golf Courses Effective Against: Aphids, Ants, Armyworms, Bermudagrass mites, Bluegrass billbugs, Box elder bugs, Chinch bugs, Clover mites, Crickets, Cutworms, Fleas, Greenbug aphids, Leafhoppers, Sod webworms Active Ingredients: Chlorpyrifos 42.5% States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY. PRODUCT IS DOT HAZMAT.					
<b>09410</b>	<b>Talstar S Gallon (RUP)</b>	<b>Bifenthrin 7.9%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Talstar Nursery Flowable is a restricted use pesticide for control of mites and insects. Labeled for use on both indoor and outdoor ornamentals in greenhouses and nurseries. Active Ingredient: Bifenthrin 7.9%. Restricted Use Pesticide. Pesticide applicators license required to purchase.					
<b>09420</b>	<b>Tame 2.4EC Quart (RUP)</b>	<b>Fenpropathrin 30.9%</b>	<b>QT</b>	<b>12</b>	<b>OAN</b>
Tame 2.4 EC Spray is a miticide/insecticide labeled for use on indoor and outdoor ornamentals. Tame 2.4 EC controls a wide variety of mites and other insects such as aphids and whiteflies. Makes a good tank mix with Acephate. Restricted Use Pesticide. DOT Hazmat material. PRODUCT IS DOT HAZMAT.

## FUNGICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>01280</b>	<b>3336 DG Fungicide 30 lb.</b>	<b>Thiophanate Methyl 2%</b>	<b>BG</b>	<b>49</b>	<b>STK</b>
3336 DG Lite is formulated with patented granular dispersing technology. Following spreader application, particles quickly disperse upon contact with moisture for improved penetration into the root zone. Key uses include turfgrass, annual and perennial flowers, commercial and residential turf, athletic fields, golf courses and more. Key diseases controlled anthracnose, cool-season brown patch, dollar spot, fusarium blight/patch, gray leaf spot, large brown patch, leaf spot, necrotic ring spot, pink snow mold, red thread, spring dead spot, zoysia patch. See label for complete list.					
<b>01318</b>	<b>Aliette WDG Fungicide 5 lb.</b>	<b>80% Aluminum tris (O-ethyl phosphonate)</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Aliette brand fungicide delivers two-way systemic protection against Pythium & Phytophthora. Labeled for a wide range of crops including Ornamentals & bedding plants grown in the field, nursery or greenhouse. Also labeled for landscape & turf uses as well. Can be applied by a soil drench or foliar spray. Always read and follow current label instructions.					
<b>01805</b>	<b>Captan 50WP Fungicide 5 lb.</b>		<b>BG</b>	<b>10</b>	<b>STK</b>
<b>N-Trichloromethylthio-4-cyclohexene-1, 2-diacaboximide 48.93%</b> - Captan is labeled for use on ornamentals, turf, fruit trees for control of black spot, blossom blight, botrytis, damping off, leaf spot and rust. Use as a drench or spray.					
<b>01715</b>	<b>Daconil WeatherStik Fungicide Agency 2.5 gal.</b>	<b>Chlorothalonil 54.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Daconil is for use on production ornamentals ( both greenhouse and nursery), golf course tees, fairways, greens, non-residential turfgrasses, sod farms, and ornamental turfgrasses. Daconil controls 14 turfgrass diseases, including dollar spot, brown patch, gray leaf spot, algae, leaf spot, melting out, anthracnose, rust, Fusarium patch, Gray snow mold and red thread. In ornamentals, Daconil controls over 50 major diseases, including powdery mildew, scab, rust, as well as many other foliar and leaf spots and blights.					
<b>01225</b>	<b>Dithane 75DF T&amp;O Fungicide 12 lb.</b>	<b>Manganese 15%, Zinc 1.87%, Ethylene 58.13%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Dithane Rainshield turf and ornamental specialty fungicide is a broad spectrum ornamental contact fungicide for preventative control of rust, scab and other key diseases. Dithane offers control of major leaf spots and blights of ornamental plants and turf.					
<b>01227</b>	<b>Eagle 20EW Fungicide Pint</b>	<b>myclobutanil, triazole 19.7%</b>	<b>EA</b>	<b>8</b>	<b>STK</b>
Eagle 20EW specialty fungicide is a systemic, protectant and curative fungicide for the control of certain diseases. Eagle 20EW controls powdery mildew, certain leaf spots, rust, white rust and other diseases. Labeled for use on: Turfgrass, landscape ornamentals, greenhouse & nursery ornamentals. apples, stone fruits and grapes.					
<b>81228</b>	<b>FL F-Stop Lawn Fungicide 10 lb.</b>	<b>Myclobutanil 0.39%</b>	<b>BG</b>	<b>117</b>	<b>STK</b>
F-stop is a granular product containing a systemic protectant and curative fungicide for the control of turfgrass diseases in established lawns and in ornamental turf including golf course fairways, roughs, tees and greens. It provides systemic prevention and control of turfgrass diseases including benzimidazole tolerant dollar spot. For control of turf diseases on lawns, landscapes, golf course greens, tees and fairways. Active Ingredient: Myclobutanil .39%. 4 to 8 lbs. per 1,000 sq.ft. Check label for more details.					
<b>81229</b>	<b>FL F-Stop Lawn Fungicide 20 lb.</b>	<b>myclobutanil 0.39%</b>	<b>BG</b>	<b>81</b>	<b>STK</b>
F-stop is a granular product containing a systemic protectant and curative fungicide for the control of turfgrass diseases in established lawns and in ornamental turf including golf course fairways, roughs, tees and greens. It provides systemic prevention and control of turfgrass diseases including benzimidazole tolerant dollar spot. For control of turf diseases on lawns, landscapes, golf course greens, tees and fairways. Active Ingredient: Myclobutanil .39%. 4 to 8 lbs. per 1,000 sq.ft. Check label for more details.					
<b>01725</b>	<b>Heritage Fungicide Agency 1 lb.</b>	<b>Azoxystrobin, methoxyacrylate 50%</b>	<b>LB</b>	<b>36</b>	<b>STK</b>
Heritage is a fungicide with broad spectrum, preventative fungicide with systemic and curative properties recommended for the control of many important plant diseases on turf, ornamentals, vegetables and commercial conifer and rose production. May be applied as a foliar spray in alternating spray programs or in tank mixes with other registered turf and ornamental protection products. See label for more details on vegetable use. Active Ingredient(s): Azoxystrobin.					
<b>01750</b>	<b>Micora Fungicide Agency Qt.</b>	<b>Mandipropamid 23.3%</b>	<b>QT</b>	<b>4</b>	<b>STK</b>
Micora is a protectant fungicide for control of diseases caused by downy mildew fungi and Phytophthora spp. on ornamentals grown in greenhouse and outdoor production, including certain vegetable plants grown for resale. It is highly effective against spore germination, with secondary effects (prevention and reduction) on mycelial growth and sporulation.

## FUNGICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>01191</b>	<b>Quali-Pro Enclave Fungicide STW 2.5 gallon</b>	<b>Chlorothalonil, Iprodione, Thiophanate methyl, Tebuconazole</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Quali-Pro's Enclave flowable fungicide is a patented, broad-spectrum fungicide that gives a powerful weapon in the war on fungal diseases in turfgrass and ornamentals. Contains 28.7% Chlorothalonil, 9.4% Iprodione, 9.4% Thiophanate methyl, 2.8% Tebuconazole. Packed in a 2.5 gallon container. Restricted use in Massachusetts and New York. Delivers effective, long-lasting protection from anthracnose, brown patch, dollar spot, snow mold and a broad range of ornamental diseases. Labeled for use on golf courses, commercial turf, landscape ornamentals, nursery & greenhouse.					
<b>01195</b>	<b>Quali-Pro Fosetyl-AI 80 WDG Fungicide 5.5 lb.</b>	<b>Aluminum tris 80%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Fosetyl-AI 80 WDG Fungicide from Quali-Pro provides long-lasting, broad spectrum preventative control of diseases such as Pythium and Phytophthora in turf, ornamentals and bedding plants. True up-and-down systemic action for effective, preventative turf/plant disease control. Stimulates defense mechanisms, enhances plant vigor. Single application delivers up to 30 days protection. Use sites: nursery, greenhouse, golf courses, turf. Effective Against: pythium blight, yellow tuft, phytophthora, downy mildew, fire blight, bacterial blight. Active Ingredients: Aluminum tris 80%.					
<b>01302</b>	<b>Quali-Pro Ipro 2 Fungicide 2.5 Gallon</b>	<b>Iprodione 23.8%</b>	<b>EA</b>	<b>2</b>	<b>OAN</b>
Iprodione fungicide provides proven control of Botrytis, Fusarium, Rhizoctonia and many other diseases in turf and ornamentals. EPA Registration 81959-4. Caution signal word. Brand alternative: Chipco 26GT. WARNING! This product can expose you to chemicals including iprodione which is known to the State of California to cause cancer. For more information go to <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .					
<b>01205</b>	<b>Quali-Pro Mefenoxam 2 AQ Fungicide Gallon</b>	<b>Mefenoxam 22.5%</b>	<b>GL</b>	<b>2</b>	<b>OAN</b>
Mefenoxam 2 AQ Water-based formulation features low odor. Systemic mode of action and translocation through the plant can provide up to 3 weeks protection. Labeled for use in Nurseries, Greenhouses, Landscape, Turf and Trees. Effective against Pythium, Phytophthora, Yellow Tuft, Downy Mildew. Active Ingredient: Mefenoxam. Non Stock. Special order. Allow adequate time for delivery.					
<b>01735</b>	<b>Subdue GR Fungicide 25 lb.</b>	<b>Mefenoxam 1.0%</b>	<b>BG</b>	<b>40</b>	<b>STK</b>
Subdue is labeled for use on a wide variety of ornamentals as well as turf. Subdue controls damping off, downy mildew phytophthora and pythium. Subdue granular is used as a soil incorporation. Active Ingredient: Metalaxyl.					
<b>01745</b>	<b>Subdue Maxx Fungicide Agency Gallon</b>	<b>Mefenoxam 22.0%</b>	<b>GL</b>	<b>2</b>	<b>AGY</b>
Subdue MAXX fungicide offers superior control of Pythium blight. It is a microemulsion concentrate formulation providing excellent tank mix compatibility and stability; no odor, and mixes into a clear solution. For added control add Medallion to the tank mix. Active Ingredient: Mefenoxam.					
<b>01740</b>	<b>Subdue Maxx Fungicide Quart</b>	<b>Mefenoxam 22.0%</b>	<b>QT</b>	<b>12</b>	<b>STK</b>
Subdue MAXX fungicide offers superior control of Pythium blight. It is a microemulsion concentrate formulation providing excellent tank mix compatibility and stability; no odor, and mixes into a clear solution. For added control add Medallion to the tank mix. Active Ingredient: Mefenoxam.					
<b>01220</b>	<b>Terrazole 35W Fungicide 2 lb.</b>	<b>Etridiazole 35%</b>	<b>EA</b>	<b>6</b>	<b>OAN</b>
Terrazole 35W is an effective soil fungicide for prevention and control of damping-off, root rot and stem diseases caused by Pythium and Phytophthora species in ornamental and nursery crops. Labeled for use on ornamental and nursery crops as well as golf course turf.					
<b>01223</b>	<b>Terrazole L Fungicide Quart</b>	<b>Etridiazole 44.3%</b>	<b>EA</b>	<b>8</b>	<b>OAN</b>
Terrazole L is an emulsifiable concentrate (EC) formulation of the active ingredient etridiazole. Terrazole L is labeled for pythium and phytophthora control on ornamentals grown in production. It is also labeled for pythium control on golf course tees and greens. Terrazole L can be used as both a preventative and curative product.

## HERBICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>03700</b>	<b>Barricade 4FL Herbicide Agency Gallon</b>	<b>Prodiamine 40.7%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Barricade is a preemergence herbicide that offers low rate, season-long control of 30 grassy and broadleaf weeds, including crabgrass, goosegrass and Poa annua, in turf and ornamentals. Its unique, non-staining active ingredient and application flexibility have quickly made Barricade one of the most popular herbicides in the green industry. Barricade is available in either a 4FL flowable or 65WG water-dispersible granule formulations. Apply in the fall to control crabgrass through the following growing season.					
<b>03897</b>	<b>Cheetah Pro Post Emergent Herbicide 2.5 gallon</b>	<b>Glufosinate ammonium 24.5%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Cheetah Pro is a non selective post emergent herbicide containing Glufosinate. This product is foliar and has little or no soil activity. Weeds emerging after application will not be affected. Necrosis of leaves and young shoots begins 2-4 days after application under active growing conditions. Important: Always read and follow manufacturer's label before use.					
<b>03895</b>	<b>Cheetah Pro Post Emergent Herbicide 64 oz.</b>	<b>Glufosinate ammonium 24.5%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Cheetah Pro is a non selective post emergent herbicide containing Glufosinate. This product is foliar and has little or no soil activity. Weeds emerging after application will not be affected. Necrosis of leaves and young shoots begins 2-4 days after application under active growing conditions. Important: Always read and follow manufacturer's label before use.					
<b>03603</b>	<b>Clipper Herbicide 1 lb.</b>	<b>Flumioxazin 57%</b>	<b>EA</b>	<b>4</b>	<b>OAN</b>
Clipper aquatic herbicide delivers fast and selective control of invasive and nuisance plants. Plus it dissipates quickly from the water column meaning minimal irrigation restrictions, and does not accumulate in sediment. Key uses include management of undesirable aquatic vegetation in slow moving or quiescent waters and can be applied in many settings including bayous, drainage ditches, lakes, marshes, ponds (including golf courses) and reservoirs. Key weeds controlled include alligatorweed, cabomba, coontail, curlyleaf pondweed, duckweed, Eurasian watermilfoil, fanwort, filamentous algae, frogs-git, hydrilla, pondweed, sago pondweed, water fern, water lettuce, water pennywort, watermeal, and variable-leaf watermilfoil.					
<b>03202</b>	<b>Dimension 2EW Herbicide .5 gal.</b>	<b>Dithiopyr 24%</b>	<b>EA</b>	<b>1</b>	<b>OAN</b>
"Dimension 2EW pre emergent herbicide controls crabgrass and other annual grasses and broadleaf weeds. Labeled for use on: established lawns, commercial sod farms, ornamental turf, field-grown nursery ornamentals and landscape ornamentals. Weeds controlled: Crabgrass, Goosegrass, Barnyardgrass, Sandbur, Bittercress, chickweed, oxalis buttercup, common purslane, spurge and others.					
<b>03382</b>	<b>Diquat SPC 2L Herbicide 2.5 gal.</b>	<b>Diquat dibromide 37.3%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Diquat 2 L is a fast acting, broad-spectrum contact herbicide for total weed control in wide range of sites including greenhouse, aquatic and others. PRODUCT IS DOT HAZMAT.					
<b>03380</b>	<b>Diquat SPC 2L Herbicide Gal.</b>	<b>Diquat dibromide 37.3%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Diquat 2 L is a fast acting, broad-spectrum contact herbicide for total weed control in wide range of sites including greenhouse, aquatic and others. PRODUCT IS DOT HAZMAT.					
<b>03135</b>	<b>Eraser Herbicide Foaming Spray 19 oz.</b>	<b>Glyphosate</b>	<b>EA</b>	<b>6</b>	<b>DNR</b>
Eraser Foaming Weed Killer contains glyphosate and pelargonic acid and related fatty acids; the same ingredients found in Roundup Sure Shot Foam. Eraser foaming weed killer is a convenient ready to use formula that is waterproof in just ten minutes after application. Kills weeds and Johnson Grass down to the root. Foam application allows you to see where you have sprayed and allows application to weeds located in tough places. WARNING! This product can expose you to chemicals including glyphosate which is known to the State of California to cause cancer. For more information go to <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .					
<b>03010</b>	<b>Finale Herbicide 2.5 Gallon</b>	<b>Glufosinate-ammonium 11.33%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Finale is a post emergence herbicide for non selective weed control of emerged weeds in noncrop areas. Effects of Finale will begin to show within 2-4 days of application. Thorough coverage is important to maximize control. Will not control weeds that have not emerged. Finale works best on weeds that are actively growing.					
<b>03708</b>	<b>Fusilade II Herbicide Quart</b>	<b>Fluazifop-p-butylbutyl 24.5%</b>	<b>QT</b>	<b>8</b>	<b>STK</b>
Fusilade II: For the Selective Control of Grass Weeds in Landscaped areas, Roadsides, Nurseries, Greenhouses, , Flower Beds, Groundcovers, Interiorscapes, Parks, Sports Fields, Golf Courses, Commercial & residential areas. A selective postemergent herbicide, Fusilade II turf and ornamental herbicide controls a long list of both perennial and annual grass weeds in a variety of turf and landscape areas. Extremely fast and effective, Fusilade II can be applied over-the-top or as a directed spray without damaging valuable ornamental plantings. It can also be used at reduced rates to safely remove Bermudagrass from tall fescue and zoysia grass.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. ## HERBICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>03205</b>	<b>Gallery 75DF Herbicide 1 lb.</b>	<b>Isoxaben 75%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Gallery 75 dry flowable herbicide is a preemergence product for control of certain broadleaf weeds in established turf , landscape ornamentals,container grown ornamentals, and field grown ornamentals. Apply Gallery 75DF in late summer to early fall, early spring or anytime prior to the germination of target weeds or after cultivation.					
<b>03206</b>	<b>Gallery SC Herbicide Quart</b>	<b>Isoxaben 45.45%</b>	<b>EA</b>	<b>16</b>	<b>OAN</b>
Gallery SC herbicide is a preemergence product for control of certain broadleaf weeds in established turf , landscape ornamentals,container grown ornamentals, and field grown ornamentals. Apply Gallery SC in late summer to early fall, early spring or anytime prior to the germination of target weeds or after cultivation.					
<b>03040</b>	<b>Glyphosate 5.4 Herbicide 2.5 gallon</b>	<b>Glyphosate 53.8%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Controls annual and perennial broadleaf weeds and grasses such as leafy spurge and cheat grass. For weed control and/or turf height suppression on non-cropland areas including range/pastureland, roadsides, rights-of-way.					
<b>03905</b>	<b>Hi Yield Killzall SC Herbicide 2.5 Gallon</b>	<b>Glyphosate 41.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Killzall Super Concentrate is a post-emergent herbicide that controls broadleaf and most grassy weeds. No additional surfactant needed.					
<b>03375</b>	<b>Manor Herbicide 2 oz.</b>	<b>Metsulfuron Methyl 60%</b>	<b>EA</b>	<b>16</b>	<b>STK</b>
Manor is a highly selective premium post-emergent herbicide for effective control of grassy and broadleaf weeds in turfgrass. Manor is specially formulated to control annual and perennial weedy grasses such as Ryegrass, Bahiagrass and Foxtail and also provide effective control of broadleaf weeds such as Clover and Dollarweed. The active ingredient, Metsulfuron Methyl, is absorbed through the plant's surface and roots to inhibit the production of key amino acids. This action prevents cell division and stops weed growth. Packed in a 2 oz. container.					
<b>03709</b>	<b>Pennant Magnum Herbicide Gallon</b>	<b>S-metolachlor 83.7%</b>	<b>GL</b>	<b>4</b>	<b>OAN</b>
Pennant Magnum pre emergent herbicide controls many annual grasses, certain broadleaf weeds, and yellow nutsedge. It is labeled for use on commercial and residential warm-season turfgrasses on non-crop land such as nurseries, sports fields and landscaped areas. Some of the weeds controlled include crabgrass, goosegrass, yellow nutsedge and pigweed.					
<b>03710</b>	<b>Princep Liquid Herbicide 2.5 gallon</b>	<b>Simazine 41.9%</b>	<b>EA</b>	<b>2</b>	<b>OAN</b>
Princep liquid is a pre-emergent herbicide for control of weeds in turf and ornamentals.					
<b>03177</b>	<b>Quali-Pro Quinclorac 75 DF 1 lb.</b>	<b>Quinclorac 75%</b>	<b>BG</b>	<b>6</b>	<b>STK</b>
Quinclorac 75 Df is a dependable post-emergent control of both broadleaf and grassy weeds in a wide variety of turf species from residential and commercial to golf courses, sports fields and sod farms. Use sites include commercial and residential turfgrass, golf courses, sports fields and sod farms. Effective control of crabgrass, clover, foxtail, dandelion, black medic, English daisy, dollarweed, barnyardgrass and others. Contains 75% quinclorac. Product is for professional use.					
<b>03292</b>	<b>QuickPRO Roundup Herbicide 6.8 lb.</b>	<b>Glyphosate 73.3%, Diquat dibromide 2.9%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Roundup QuikPRO is a granular post emergent herbicide for turf and ornamental use. Quick acting.					
<b>03280</b>	<b>Ranger Pro Herbicide 2.5 gallon</b>	<b>Glyphosate 41.0%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Ranger Pro is a complete broad spectrum postemergence herbicide for turf, industrial and ornamental weed control. 41% Glyphosate plus surfactant.					
<b>03283-T</b>	<b>Ranger Pro Herbicide 30 gallon</b>	<b>Glyphosate 41.0%</b>	<b>EA</b>	<b>4</b>	<b>STK</b>
Ranger Pro is a complete broad spectrum postemergence herbicide for turf, industrial and ornamental weed control. 41% Glyphosate plus surfactant.					
<b>03715</b>	<b>Reward Herbicide Agency 2.5 gallon</b>	<b>Diquat dibromide 37.3%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Reward Landscape and Aquatic Herbicide is a nonvolatile herbicidal chemical for use as a general herbicide to control weeds in commercial greenhouses and nurseries; ornamental seed crops, landscape, industrial, recreational, commercial,residential, and public areas; turf renovation (all turf areas except commercial sod farms); dormant established turfgrass (bermudagrass, zoysiagrass); and aquatic areas. PRODUCT IS DOT HAZMAT.					
<b>03285</b>	<b>Roundup Promax Herbicide 1.67 Gal.</b>	<b>Glyphosate 48.7%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Roundup Pro Max is a post-emergent, systemic herbicide for us on non-crop, industrial, turf and ornamental applications. It gives control of many annual weeds, perennial weeds, woody brush and trees. Contains Glyphosate. It is formulated as a water-soluble liquid containing surfactant and no additional surfactant is needed or recommended.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. # CHEMICALS

## HERBICIDES

Product	Description	Active Ingredient	UM	Pack	Type
03295	Scythe Herbicide 2.5 gallon	Pelargonic Acid 57.0%, Related fatty acids 3.0%	EA	2	OAN
Scythe is used for control or burndown on a wide variety of weeds on contact. Best applied when weeds are actively growing. All products may not be registered for sale or use in all states. Please check with your local Extension Service to ensure registration status.					
03505	Sonar AS Aquatic Herbicide Qt.	Proprietary Ingredient	QT	1	OAN
Sonar aquatic herbicide offers both selective and broad-spectrum control capabilities. Sonar selectively manages problem weeds for a year or longer, with minimal risk to the environment. Aquatic Herbicide for freshwater ponds, lakes, reservoirs, potable water sources, drainage canals and irrigation canals. Do not use Sonar treated water for irrigating greenhouse and nursery plants.					
03432	Trimec Southern Quart	Dimethylamine salt 17.37%, Dimethylamine salt of 2 18.74%, Dimethylamine salt of dicamba 3.85%	EA	12	STK
Trimec Southern is designed to minimize risk to sensitive southern turfgrasses. Trimec Southern is formulated with less 2,4-D to accommodate sensitive warm- season grasses, and higher in MCPP to maintain the quality performance you expect from a Trimec complex. This adjustment in formulation is the optimum ratio for knocking out clover. Trimec Southern is intended for use on bermuda grass, zoysia grass, centipedegrass and St. Augustine grass* and can also be used on cool-season grasses such as bluegrass, fescues and ryegrass.*Do not apply this product to Floratam St. Augustinegrass.					

03905

03280

03901

## INSECTICIDES/MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
03901	BroadStar Herbicide 50 lb. STW	Flumioxazin 0.25%	BG	40	STK
Broadstar provides pre-emergent control of many broadleaf and grass weeds. Very effective against bittercress, spurge, and liverwort. Labeled for use on landscapes and outdoor ornamentals.					
03310	Fuerte Herbicide STW 50 lb. Bag	Flumioxazin 0.125%, Prodiamine 0.75%	BG	40	STK
Fuerte is a unique pre-emergent combination granular product that controls broadleaf and grassy weeds including hard-to-control weeds such as oxalis, spurge, and eclipta on trees, shrubs, conifers, and landscape ornamentals without harming desirable plant material. The dual active ingredients in Fuerte -- flumioxazin and prodiamine -- are natural partners that have a proven track record for excellent weed control and overall plant tolerance, and the power to provide weed control in the challenging summer months. See label for application rates.					
03008	Pendulum 2G Herbicide 40 lb. bag	Pendimethalin 2.0%	BG	50	OAN
Pendulum 2G herbicide consistently controls crabgrass better than other preemergent herbicides. Pendulum 2G controls an incredibly broad spectrum of weeds more than 40 grassy and broadleaf weeds in all including troublesome weeds like oxalis, henbit and spurge.

## INSECTICIDES/MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
03170	Quali-Pro Oxadiazon 2G Herbicide 50 lb.	Oxadiazon 2.0%	BG	40	STK
A selective, pre-emergent herbicide for control of annual grasses and broadleaf weeds in turf and woody ornamental shrubs, vines, and trees. Labeled for Nursery, Landscape and Turf uses. Effective Against: Bittercress, Carpetweed, Annual Bluegrass, Crabgrass, Common Groundsel, Petty Spurge, Barnyardgrass. Active Ingredients: Oxadiazon 2%. Compare to Ronstar G. WARNING! This product can expose you to chemicals including oxadiazon which is known to the State of California to cause cancer. For more information go to <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .					
03510	Snapshot DG Herbicide 25 lb.	Trifluralin 2.0%, Isoazoly, Isomers 0.5%	BG	84	STK
Snapshot DG is a selective pre emergence herbicide for use on landscape ornamentals, container grown ornamentals, field grown ornamentals, and groundcovers/perennials. Snapshot DG controls certain broadleaf weeds and annual grasses.					
04702	Advion Fire Ant Bait 2 lb.	Indoxacarb 0.045%	EA	8	STK
Advion® fire ant bait provides quick and effective control of fire ants. With only one application, Advion fire ant bait helps control foraging worker ants within 12 to 48 hours and the total colony is controlled within 72 hours, including the queen. After two applications, year-long colony control can be achieved.					
04703	Advion Fire Ant Bait 25 lb.	Indoxacarb 0.045%	BG	40	STK
Advion® fire ant bait provides quick and effective control of fire ants. With only one application, Advion fire ant bait helps control foraging worker ants within 12 to 48 hours and the total colony is controlled within 72 hours, including the queen. After two applications, year-long colony control can be achieved.					
04090	Amdro Pro Fire Ant Bait 25 lb.	Hydramethylnon 0.73%	BG	1	OAN
When used as directed, Amdro Pro delivers proven, cost-effective control of fire ants. Provides flexible dose and application options, making it effective when used over large areas or around a single mound.					
04255	Bifen I/T Insecticide/Termiticide 32 oz.	Bifenthrin 7.9%	EA	12	STK
Bifen I/T is a professional insecticide/termiticide for pest control. It is used to control pests indoors/outdoors on residential, institutional, public, commercial and industrial buildings. Can be used on lawns, ornamentals, parks, recreational areas and athletic fields to control chinch bugs, crickets, fire ants, scorpions, aphids and other listed insects Use Sites: homes, commercial and industrial buildings, recreational areas, athletic fields, lawns and landscape ornamentals, livestock and poultry houses Not labeled for greenhouse or nursery use. Effective Against: ants, bees, beetles, boxelder bugs, carpet beetles, centipedes, clothes moths, cockroaches, crickets, earwigs, firebrats, flies, gnats, midges, millipedes, pillbugs, scorpions, silverfish, sow bugs, spiders, stink bugs, ticks, termites, and wasps. Active Ingredients: Bifenthrin 7.9% States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
04256	Bifen I/T Insecticide/Termiticide 1 gallon	Bifenthrin 7.9%	EA	4	STK
Bifen I/T is a professional insecticide/termiticide for pest control. It is used to control pests indoors/outdoors on residential, institutional, public, commercial and industrial buildings. Can be used on lawns, ornamentals, parks, recreational areas and athletic fields to control chinch bugs, crickets, fire ants, scorpions, aphids and other listed insects Use Sites: homes, commercial and industrial buildings, recreational areas, athletic fields, lawns and landscape ornamentals, livestock and poultry houses Not labeled for greenhouse or nursery use. Effective Against: ants, bees, beetles, boxelder bugs, carpet beetles, centipedes, clothes moths, cockroaches, crickets, earwigs, firebrats, flies, gnats, midges, millipedes, pillbugs, scorpions, silverfish, sow bugs, spiders, stink bugs, ticks, termites, and wasps. 04258	Bifen L/P Granules 25 lb.	Bifenthrin 0.2%	BG	96	STK
Bifen L/P granules control ants (including fire ants), fleas, mole crickets, ticks and other listed insects. Bifen L/P is on a high quality sand carrier. One 25 lb. bag covers up to 21,000 square feet. Professional commercial use only. Use sites include landscaped areas, perimeters around residential, institutional, public, commercial and industrial buildings, parks, recreational areas and athletic fields.					
04257	Bifen XTS Insecticide 32 oz.	Bifenthrin 25.1%	EA	6	STK
Bifen XTS is an insecticide/termiticide that provides long residual activity for improved pest control. It is a fast-acting synthetic pyrethroid with low odor and quick knock down controlling over 50 unwanted pests including termites, ants and surface feeding insects. May be used as pre- and post-treat termiticide, and general insecticide use. Do not use in greenhouses and nurseries. Effective Against: Ants, Armyworms, Billbugs, Chinch Bugs, Crane Flies, Crickets, Cutworms, Earwigs, Fall Webworms, Fleas (adults, larvae), Grasshoppers, Mites, Mole Crickets, Sod Webworms, Spittlebugs, Ticks, Termites. Active Ingredients: Bifenthrin 25.1%. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, ID, IL, KS, KY, LA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY. DOT Hazmat in quantities greater than 5 liters. WARNING: This product can expose you to chemicals including naphthalene which is known to the State of California to cause cancer. For more information go to <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a>

## INSECTICIDES/MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>04259</b>	<b>Cyonara 9.7 Insecticide 32 oz.</b>	<b>Lambda-cyhalothrin 9.7%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Cyonara Insecticide is a professional pest control product that contains sigma technology. It is used for outdoor perimeter pest control, indoor food handling areas, turf and ornamentals and animal housing. Great for control of tough pests like darkling beetles, ticks, flies, mosquitoes, scorpions, bed bugs and many more. Use Sites: indoor, outdoor, food areas, turf, ornamentals, animal housing. Effective Against: darkling beetles, ticks, flies, mosquitoes, scorpions, bed bugs. Active Ingredients: Lambda-Cyhalothrin 9.7%. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04263</b>	<b>Cyzmic Insecticide 32 oz.</b>	<b>Lambda-cyhalothrin 9.7%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Cyzmic CS is a controlled release insecticide with quick knockdown and long-lasting residual. It is low to no odor and can be used for outdoor perimeter pest control, indoors for food handling areas, turf and ornamentals and animal housing. Controls tough pests like darkling beetles, ticks, flies, fleas, scorpions, bed bugs and many more. Use Sites: outdoor perimeter pest control, indoors for food handling areas, turf and ornamentals, animal housing. Effective Against: ants, cockroaches, mosquitoes, silverfish, spiders, stink bugs, darkling beetles, ticks, flies, fleas, scorpions, bed bugs. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04264</b>	<b>D-Fense SC Insecticide Pint</b>	<b>Deltamethrin 4.75%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
D-Fense provides control of listed insects in and around residential and commercial buildings, including food handling areas, as well as on turf and landscape ornamental plants. Controls ants, bed bugs, cockroaches, fleas, flies, silverfish, spiders and many other listed pests. Safe for use on paints, plastics, fabrics and other surfaces. Product Type: Professional. Use Sites: in and around residential and commercial buildings, including food handling areas, turf and landscape ornamental plants. Effective Against: ants, bed bugs, cockroaches, fleas, flies, silverfish, spiders. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04265</b>	<b>Dominion 2L Insecticide 27.5 oz</b>	<b>Imidacloprid 21.4%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Dominion 2L is a termiticide/insecticide for control of subterranean termites. It contains two pounds of Imidacloprid per gallon. Dominion 2L creates a non-detectable barrier around structures, which helps aid in controlling the colony. Labeled for pre- and post-construction uses. Now with Exterior Perimeter/Interior Spot Treatment applications (EP/IST). Product Type: Professional. Use Sites: pre- and post-construction, turf and ornamentals. Effective Against: termites, ants, beetles, billbugs, chinch bugs, mole crickets. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04150</b>	<b>Ecotec Oil 2.5 gal</b>	<b>Rosemary Oil 10.00%, Peppermint Oil 2.00%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Ecotec is a unique insecticide/miticide with two modes of action. Derived from a patented blend of non-hazardous botanical oils, Ecotec provides maximum control of insects with a minimum of environmental or human impact. An emulsifiable concentrate, Ecotec will provide comparable results to that of conventional chemicals with virtually none of the hazards. Ecotec is labeled for most agricultural, ornamental and turf crops and pests. Consult the product label for specific crop, pest and application information. OMRI Listed.					
<b>04887</b>	<b>Extinguish Plus Fire Ant Bait 25 lb. Bag</b>	<b>Hydramethylnon 0.365%, S-Methoprene 0.250%</b>	<b>BG</b>	<b>1</b>	<b>STK</b>
Extinguish Plus offers a two pronged attack through its combination of Hydramethylnon and S-Methoprene. The adulticide in Extinguish Plus starts killing worker-fire ants immediately after ingestion and the IGR prevents the queen from laying fertile eggs. The result is a one-two punch for fire ants, quick reduction of mounds and the confidence that the ants will be completely extinguished through the IGR. Extinguish Plus can be used indoor and outdoor use for residential and commercial property, container or nursery stock, sod farms, commercial turf and more.					
<b>04398</b>	<b>Mallet 2F Insecticide T&amp;O Gallon</b>	<b>Imidacloprid 21.4%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Mallet 2F T&O insecticide is a liquid concentrate containing imidacloprid for the control of insect pests in nearly all residential and commercial settings. Mallet 2F is a neonicotinoid insecticide with long-lasting, residual control with proven performance on key pests such as white grubs, weevils and cutworms in turf plus aphids, mealybugs, leafminer and thrips in ornamentals.					
<b>04005</b>	<b>Metaldehyde 7.5G Insecticide 50 lb.</b>	<b>Metaldehyde 7.5%</b>	<b>BG</b>	<b>50</b>	<b>STK</b>
Metaldehyde Granules 7.5% is used as a soil surface treatment for control of snails and slugs in and around ornamental greenhouses as well as turf. Water area to be treated before treatment. Do not water again for 48 hours.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. ## INSECTICIDES/MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
04287	M-Pede Insecticide 2.5 gallon	Potassium salts of fatty acids 49.0%	EA	2	STK
M-Pede insecticide/fungicide is an effective contact insecticide, miticide and fungicide for control of soft-bodied insects, mites and powdery mildew. The formulation is based on potassium salts of naturally derived fatty acids that have been optimized for insect activity. This product may be used to control targeted pests on crops which include vegetables, grapes and other small fruits, tree fruits, tree nuts, cotton, tobacco, shrubs, shade and ornamental trees, turf, foliage an flowering plants growing outdoors, in greenhouses and in interiorscapes. OMRI listed.					
04926	Orthene TT&O Spray 97 .773lb	Acephate 97.4%	EA	12	STK
Orthene is a broad spectrum insecticide that controls pests such as aphids, thrips, fire-ants and many others. Orthene Turf, Tree & Ornamental Spray 97 is a pelletized product featuring less dust and odor.					
04270	Proflex Encapsulated Insecticide		EA	12	STK
<b>Lambda-cyhalothrin 3.88%, Novaluron 1.30%, Pyriproxyfen 1.30%</b> - Proflex is a microencapsulated concentrate containing Lambda-Cyhalothrin, Novaluron, and Pyriproxyfen. These 3 active ingredients provide 3 modes of action that make ProFlex your fast-acting and long-lasting solution for several hard to control pests including mosquitoes, cockroaches, fleas and ticks. Use Sites: For use in, on and around buildings and structures for the control of listed pests, including on lawns, ornamental trees and shrubs around residential, institutional, public, commercial, agricultural and industrial buildings; and parks, recreational areas and athletic fields. Other areas of use include industrial buildings, houses, patios, porches, closets, furniture, apartment buildings, mobile homes, laboratories, buses, greenhouses (non-commercial), stores, factories, warehouses, wineries, vessels, railcars, trucks, trailers, aircraft (cargo and other non-cabin areas only), schools, nursing homes, hospitals, mausoleums, restaurants, hotels, correctional facilities, livestock/poultry housing, pet kennels, food granaries, food grain mills and food manufacturing, processing, and servicing establishments. Effective Against: Ants (including RIFA), bed bugs, cockroaches, crickets, earwigs, firebrats, silverfish, stinkbugs, fleas, ticks, flying insect pests, stored product pests, boxelder bugs, centipedes, millipedes, mosquitoes, pillbugs, and sowbugs.					
04803	Sevin SL Insecticide 2.5 Gallon	Carbarryl 43.0%	EA	2	STK
Sevin effectively controls over 60 pests on Ornamentals, Lawns, Vegetables, Pasture, Peanuts, Tobacco, Mosquito Control, Tree fruit, Nut Crops, and Small Fruit. DOT Hazmat material.					
04097	Siesta Fire Ant Bait 15 lb.	Metaflumizone 0.063%	BG	1	OAN
which is toxic to mosquito larvae. Kills larvae of mosquitos that may transmit Zika, West Nile, Dengue, Chikungunya and Yellow Fever. 20 briquets per card.					
04030	Summit BTI Mosquito Briquets 20/card	Bacillus thuringiensis israelensis	BG	5	STK
Drop briquets into standing water or potential breeding sites. As they slowly dissolve, they release a bacterium which is toxic to mosquito larvae. Kills larvae of mosquitos that may transmit Zika, West Nile, Dengue, Chikungunya and Yellow Fever. 20 briquets per card.					
04296	Talstar PL Granular 25 lb.	Bifenthrin 0.2%	BG	60	CLR
Talstar PL is for use to control Ants (including Imported Fire Ants), Mole Crickets and other Insect pests on lawns in landscaped areas and perimeters around residential, institutional, public, commercial and industrial buildings, parks, recreational areas and athletic fields.

## MISCELLANEOUS CHEMICALS

Product	Description	Active Ingredient	UM	Pack	Type
<b>05005</b>	<b>Admiral Liquid Colorant Gallon</b>	<b>Acid Blue 9 15.31%, Acid Yellow 23 1.00%</b>	<b>EA</b>	<b>5</b>	<b>STK</b>
Admiral Liquid is used to control the growth of several types of aquatic weeds and algae while aesthetically enhancing the appearance of the water. When used as an integral component in a lake and pond management program, the look of ornamental water features, water gardens, and other contained bodies of water will be enhanced by the use of Admiral. Stocked in Gallons.					
<b>05105</b>	<b>Foam Fighter Quart</b>	<b>Dimethylpolysiloxane, silicon dioxide 10%</b>	<b>QT</b>	<b>12</b>	<b>STK</b>
Foam fighter is designed to reduce foam in chemical sprayers and also in dip tanks, such as those used in grading Peaches and Apples. Use 1 to 3 squirts whenever it is necessary to reduce foam in the tank.					
<b>05015</b>	<b>Green Lawnger Turf Colorant 2.5 Gallon</b>		<b>EA</b>	<b>2</b>	<b>STK</b>
Green Lawnger restores the natural green color to turf during dormant periods. Green Lawnger may also be pre-applied to divot mix sand, giving the mix a natural green color. Green Lawnger contains no hazardous chemicals, heavy metals, or other inert ingredients known to be harmful to turf.					
<b>05920-T</b>	<b>Green-Shield II Disinfectant 30 gallon</b>	<b>Quaternary Ammonium Compounds</b>	<b>DR</b>	<b>1</b>	<b>OAN</b>
Green-Shield II Disinfectant & Algicide is a simple but cost effective way to control unwanted plant pathogens and algae. It is the first step in a successful disease management program. Labeled for use in Greenhouses, Nurseries, Landscapes and Interiorscapes on work areas, benches, tools, containers, walkways, floors and evaporative cooling pads. Unlike bleach, Green-Shield II is EPA-registered for broad-spectrum control of pathogens and algae in and around greenhouses and causes no damage to clothing from splashes. Green-Shield II lasts four times longer in solution than bleach and provides residual control as long as treated surfaces stay wet, without bleach's odor, irritation and volatility. One gallon of Green-Shield II is equivalent to 28 gallons of bleach. Green-Shield II is labeled for use in greenhouses, nurseries, landscapes and interiorscapes on work areas, benches, tools, containers, walkways, floors and evaporative cooling pads. Green-Shield II controls fungal, bacterial and viral plant pathogens and algae. Green-Shield is not labeled for use in California. PRODUCT IS DOT HAZMAT.					
<b>05915</b>	<b>Green-Shield II Disinfectant Gallon</b>	<b>Quaternary Ammonium Compounds</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Green-Shield II Disinfectant & Algicide is a simple but cost effective way to control unwanted plant pathogens and algae. It is the first step in a successful disease management program. <b>05110</b>	<b>Hot Sauce Repellant 1/2 Gallon</b>	<b>Capsaicin 2.5%</b>	<b>EA</b>	<b>6</b>	<b>OAN</b>
Hot Sauce Animal Repellent is a water-miscible, highly concentrated extract derived from hot peppers. Animals attempting to feed upon treated plants or other items are unlikely to be harmed. A warm sensation which the product is believed to cause in the throats of these animals may discourage feeding in situations where the animals have freedom to select other foods. Vapor Gard, an anti-transpirant film former, may prolong the effective life of Hot Sauce. Always read and follow label directions.					
<b>05050</b>	<b>Indicate 5 Adjuvant Gallon</b>	<b>Blend of Alkyl Aryl Ethoxylates &amp; Water 80%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Patented INDICATE 5 is the only adjuvant that contains a built in pH indicator, turning the spray water pink as soon as the optimum level of 4.5-5.5 is reached. It eliminates the need to test the water pH with any additional equipment. INDICATE 5 counters both the detrimental effects of high pH and hard water on sensitive pesticides. Chemicals sensitive to alkaline hydrolysis include: Glyphosate, Organo Phosphates, Synthetic Pyrethroids, Carbamates, Chlorinated Hydrocarbons, Triazines and others. INDICATE 5 acts as a wetting, spreading and penetrating agent resulting in an even film of spray over the leaf and better pesticide performance.					
<b>05055</b>	<b>Insure Wetter/Spreader 2.5 gal</b>	<b>Alkyl Aryl Polyther Phosphate, Organo Phosphates, water 80.0%</b>	<b>EA</b>	<b>2</b>	<b>OAN</b>
INSURE enhances the performance and consistency of post emergent herbicides by reducing or eliminating the tie-up of anionic herbicides including glyphosate and amine salt herbicides with metal cations presence in hard water such as Calcium (Ca), Magnesium (Mg) and Iron (Fe). INSURE also increases compatibility of micronutrient tank mixes such as Manganese (Mn) with glyphosate and other anionic herbicide that are deactivated by metal cations. INSURE contains ammonium ions for improved herbicide uptake and translocation in difficult to control weeds. INSURE applied at a rate of 2 pints per 100 gallons is typically sufficient to lower the pH of the spray solution to approximately 4.5 - 5.5, extremely alkaline and hard water may require additional amounts. INSURE is buffered and will not lower the pH of the tank solution below 4.0. INSURE has some capabilities as a buffer and as wetter spreader.					

● **Important:** Always read and follow label instructions. All products may not be registered for sale or use in all states. Please check with your local Extension Service to ensure registration status. ● **Product Type:** **STK**- Stock Item, **OAN**- Order as Needed (not stocked), **DNR**- Discontinued Item.

# CHEMICALS

## MISCELLANEOUS CHEMICALS

Product	Description	Active Ingredient	UM	Pack	Type
05115	Nu-Film P Spreader/Sticker Gallon	Pinene Polymers, Petrolatum, alkyl amine ethoxylate 100%	GL	4	STK
NU-FILM P is a superior STICKING agent designed for use with all pesticides. It is compatible in the spray tank with all commercially used pesticide products and soluble fertilizers. NU-FILM P forms a sticky, elastic film which tenaciously holds the pesticide on the crop foliage and greatly reduces rainfall and overhead irrigation erosion of the spray residue. It will withstand about 1 inch of rainfall for seven to ten days, thus insuring that pesticide sprays are not lost shortly after application. Apply at least one hour, during daylight, before an anticipated rain.					
05018	Selontra Rodent Bait 8 lb. Pail	Cholecalciferol	EA	1	STK
Selontra rodent bait delivers real efficiency for your business. It controls entire infestations in just seven days, which lowers both your labor and material costs. Its shortened baiting program requires less bait, and the stop-feed action of the active ingredient, cholecalciferol, makes a little go a long way: rodents eat only enough for a lethal dose, leaving more for the rest of the colony. Selontra rodent bait is effective against anticoagulant-resistant rodents, and it demonstrates proven palatability even when desirable food sources are available. And with a durability that holds up in tough conditions, rodent bait creates less waste, so it takes care of business while making yours more efficient. Selontra rodent bait offers three major advantages to your business:— Fast colony kill: Controls infestations in seven days in U.S. field trials— Efficient use of bait: Allows for shorter baiting programs, less bait to kill populations, and reduced waste— Effective resistance management: Kills anticoagulant resistant rodents.					
05120	Spray-Aide Surfactant Gallon	Olyethylene glycol alkyl ether phosphate and potassium salts 75%	GL	4	STK
Spray-Aide is a concentrated compatibility-acidifying-surfactant agent designed to improve spray tank compatibility of pesticides, to lower the pH of spray tank water or liquid fertilizer solutions, as a spreader for use with pesticides and to reduce soil crusting. Can also be used as a tank cleaner and sprinkler/drip line cleaning agent. .					
05060	Super 7 Non Ionic Surfactant Gallon	Alcohol ethoxylate, lecithin and propanoic acid 82.5%	EA	4	OAN
SUPER 7 is a non-ionic, low foam surfactant that enhances the activity and effectiveness of pesticides and foliar nutrients. SUPER 7 provides more uniform coverage by decreasing surface tension of spray solutions, thus aiding in penetration. It may be used as an acidifying agent to lower pH of spray solutions, thus preventing alkaline hydrolysis of pesticides sensitive to high pH.					
05009	Turf Mark Blue Spray Indicator 2.5 gallon		EA	2	STK
Turf Mark takes the guesswork out of spraying! It's the proven and professional way to apply liquid pesticides and fertilizers. Turf Mark dissipates quickly in either wet or dry weather, making it the ideal temporary spray colorant. The distinctive color shows you exactly where you've sprayed, preventing skips and overlaps and helping to pinpoint drift. Turf Mark makes spray applications virtually foolproof. You'll save time and money.					
05007	Turf Mark Blue Spray Indicator Quart		QT	12	STK
Turf Mark takes the guesswork out of spraying! It's the proven and professional way to apply liquid pesticides and fertilizers. Turf Mark dissipates quickly in either wet or dry weather, making it the ideal temporary spray colorant. The distinctive color shows you exactly where you've sprayed, preventing skips and overlaps and helping to pinpoint drift. Turf Mark makes spray applications virtually foolproof. You'll save time and money.

05065	<b>Ultra 90-NF Surfactant 2.5 gallon</b>		EA	2	OAN
<b>Alkyl phenol ethoxylate, Polyethylene glycol, Isopropanol, and Polydimethylsiloxane 90</b> - ULTRA 90-NF is a non-ionic surfactant containing an anti-foaming agent. It improves wetting of foliage and enhances the effectiveness of spray applications. It will not cause excessive foaming in the spray tank nor corrode equipment. ULTRA 90-NF may be used on agricultural, aquatic, forestry, turf and ornamental, industrial, structural and non-cropland sites. NOT FOR AQUATIC USE IN WASHINGTON.					
05125	<b>Vapor Gard Anti Transpirant Gallon</b>	<b>Di-1-p-Menthene 96%</b>	GL	4	STK
Vapor Gard is a water emulsifiable organic concentrate for use on plants to reduce water transpiration. The soft, flexible film formed after the spray application dries, will significantly reduce moisture lost by the plant foliage. All anti-transpirant spray applications must be applied for full coverage. Apply Vapor Gard at least one hour, during daylight, before an anticipated rain. Vapor Gard also beautifies plants by polishing leaf surfaces.

07502	<b>Apex-10 2.5 gallon</b>		EA	2	STK
<b>Peat Humic Substance, Naturally derived Polyhydroxy Carboxylic Acids</b> - APEX-10 is an organic peat humic substance made from highly humified peat sources that have a variety of very active and complex materials from plant fibers and contain many active organic constituents. What differentiates this product from anything on the market is the patented extraction process used to recover all of these humic substances along with humic and fulvic acids in their most beneficial form. The result is a formula with a greater power than simply the sum of its parts. This creates the ultimate product for soil and plant health which has been proven to: Enhance Fertilizer Efficiency by up to 66% Improve Water Efficiency by up to 30% Increase Plant Turgidity Enhance Soil Nutrient Retention & Make Nutrients More Available to the Plant Dramatically Reduce the Potential of Root Loss Under Stressful Conditions Improve Overall Plant Performance APEX-10 has been thoroughly tested and proven through university studies and real world applications, offering industry professionals an organic alternative that maximizes the efficiency of their operations and complements their environmental initiatives without compromising performance. <b>DIRECTIONS FOR USE:</b> Invert & shake well before use. Cool Season Sports Turf Seeding: Apply 1.5 oz every 14 days or 3.0 oz every 30 days per 1,000 sq. ft. Warm Season Sports Turf Seeding: Apply 1.5 oz to 3 oz every 14 days or 3oz to 6oz every 30 days per 1,000 sq ft depending on turf species and growth rate. Residential Turf: Apply 3.0oz for cool season turf; 6.0oz for warm season turf per 1,000 sq ft every 60 days. Sod: At installation, spray soil; then sod at warm or cool season rates. Planting/Transplanting: Shrubs, dilute 1.0oz in at least 2.5gal of water. Trees, dilute 2 oz in at least 5 gal of water. Pour in hole, place rootball pour over rootball. Flowers, dilute 1.0 oz in 5 gal of water, dip roots in mixture prior to planting. Maintenance/Spraying Device: Foliar application of 1.0 oz per 5 gal of water every 60 days during growing season. Avoid petals of flowering plants."					
07520	<b>H2Flo Soil Wetting Agent 2.5 Gallon</b>		EA	2	STK
<b>Ethylene oxide-propylene oxide copolymers, (2-methoxymethylethoxy)propanol</b> - H2Flo is a unique blend of surfactants designed to move water and fertilizers quickly and efficiently through soil. H2Flo leads the way in water conservation products with the highest concentration of active ingredients (88%) of the most advanced wetting agents available. H2Flo allows growers and farmers to move less water and save more water.					
07453	<b>Hydretain ES Plus 2.5 gal</b>	<b>Humectants 50.0%, Surfactants 0.4%</b>	EA	2	OAN
H3O is a revolutionary new chemistry designed to reduce the watering requirements of plants and turf. Its patented blend of liquid humectant and hygroscopic compounds attract free water molecules from the air within the soil matrix and efficiently transfers them into the roots of plants. This simple mechanism results in healthy, vigorous, drought resistant turf, trees, shrubs, ornamental plants and agriculture.					
09022	<b>2,4-D Amine Herbicide (RUP)</b>	<b>Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 47.2%</b>	BG	1	STK
For control of many broadleaf weeds and brush control in corn (field, pop and sweet), sorghum (Milo), soybeans (preplant), small grains (barley, millet, oats, rye, wheat), rice, sugarcane, fallow land, grasses, stone fruits and nut orchards, brush control, pastures, rangelands, forest management and in noncrop areas such as lawns and ornamental turf, drainage ditchbanks, fence rows and rights-of-way. Also for aquatic weed control, control of trees by injection, and tank mixes. <b>ACTIVE INGREDIENT:</b> Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 47.2%. State Restricted Use Pesticide. Applicators license required to purchase.

# CHEMICALS

## RESTRICTED USE CHEMICAL PRODUCTS

Product	Description	Active Ingredient	UM	Pack	Type
09310	Cool Power Herbicide 2.5 gal. (RUP)	Isooctyl 56.14%, Butoxyethanol 5.000%, Dicamba 3.60%	EA	2	OAN
Cool Power post emergent herbicide is specifically designed for application during cool weather conditions or selective spot spray in warm conditions. Key uses include golf courses, turf, lawns, parks, athletic fields and more. Key weeds controlled include black medic, buckhorn, chickweed, clover, dandelion, ground ivy, henbit, kochia, lespedeza, mallow, oxalis, plantain, spurge, thistle, wild geranium, wild violet, woodsorrel. Check label for more information. State limited use pesticide (dicamba). APPLICATORS LICENSE REQUIRED TO PURCHASE. "					
09415	Quali-Pro Chlorpyrifos 4E 2.5 gallon (RUP)	Chlorpyrifos 42.5%	EA	2	DNR
Broad spectrum restricted use insecticide for commercial nursery and greenhouse. For use on golf course turf, industrial turf and ornamentals. Proven control of hundreds of insect pests, including ants, borers, cutworms, fall webworms, gypsy moths, leaf feeding beetles and mole crickets. Delivers long-lasting control. Stops pest feeding by inhibiting nervous system activity. Labeled for use on ornamentals and turf on golf courses, and a wide variety of outdoor and nursery-grown ornamentals. Product Type: Professional Use Sites: Nursery, Greenhouse, Trees, Golf Courses Effective Against: Aphids, Ants, Armyworms, Bermudagrass mites, Bluegrass billbugs, Box elder bugs, Chinch bugs, Clover mites, Crickets, Cutworms, Fleas, Greenbug aphids, Leafhoppers, Sod webworms Active Ingredients: Chlorpyrifos 42.5% States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
09325	SpeedZone Southern 2.5 gallon (RUP)	Carfentrazone-ethyl 0.54%, 2,4-D, 2-ethylhexyl ester 10.49%, Mecoprop-p acid 2.66%, Dicamba acid 0.67%	EA	2	OAN
SpeedZone Southern broadleaf herbicide for turf provides exceptional and fast broadleaf weed control in sensitive southern turfgrasses. Controls tough weeds like dollarweed, creeping beggarweed, clover, plantain, ground ivy and spurge with a fast-acting response with visible activity within hours. State Limited Use herbicide (Dicamba, 2,4 D) APPLICATORS LICENSE REQUIRED TO PURCHASE"

<b>04264</b>	<b>D-Fense SC Insecticide Pint</b>	<b>Deltamethrin 4.75%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
"D-Fense provides control of listed insects in and around residential and commercial buildings, including food handling areas, as well as on turf and landscape ornamental plants. Controls ants, bed bugs, cockroaches, fleas, flies, silverfish, spiders and many other listed pests. Safe for use on paints, plastics, fabrics and other surfaces. Product Type: Professional. Use Sites: in and around residential and commercial buildings, including food handling areas, turf and landscape ornamental plants. Effective Against: ants, bed bugs, cockroaches, fleas, flies, silverfish, spiders. Active Ingredients: Deltamethrin 4.75%. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04265</b>	<b>Dominion 2L Insecticide 27.5 oz</b>	<b>Imidacloprid 21.4%</b>	<b>EA</b>	<b>6</b>	<b>STK</b>
Dominion 2L is a termiticide/insecticide for control of subterranean termites. It contains two pounds of Imidacloprid per gallon. Dominion 2L creates a non-detectable barrier around structures, which helps aid in controlling the colony. Labeled for pre- and post-construction uses. Now with Exterior Perimeter/Interior Spot Treatment applications (EP/IST). Product Type: Professional. Use Sites: pre- and post-construction, turf and ornamentals. Effective Against: termites, ants, beetles, billbugs, chinch bugs, mole crickets. Active Ingredients: Imidacloprid 21.4%. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04150</b>	<b>Ecotec Oil 2.5 gal</b>	<b>Rosemary Oil 10.00%, Peppermint Oil 2.00%</b>	<b>EA</b>	<b>2</b>	<b>STK</b>
Ecotec is a unique insecticide/miticide with two modes of action. Derived from a patented blend of non-hazardous botanical oils, Ecotec provides maximum control of insects with a minimum of environmental or human impact. An emulsifiable concentrate, Ecotec will provide comparable results to that of conventional chemicals with virtually none of the hazards. Ecotec is labeled for most agricultural, ornamental and turf crops and pests. Consult the product label for specific crop, pest and application information. OMRI Listed.					
<b>04343</b>	<b>Fendona CS Controlled Release 16 oz.</b>	<b>Alpha-cypermethrin 3.0%</b>	<b>BG</b>	<b>2</b>	<b>STK</b>
Protected inside its unique micro-mesh encapsulation, the active ingredient in new Fendona CS controlled release insecticide is a highly active pyrethroid formulation that works fast and continues to kill quickly for months, providing effective, flexible pest control. Optimized for broad coverage and durability, Fendona CS insecticide is the premier perimeter pest control solution. Fendona CS insecticide introduces an advanced encapsulation and active ingredient, alpha-cypermethrin.					
<b>04267</b>	<b>Imidacloprid 0.5 G 30 lb.</b>	<b>Imidacloprid 0.5%</b>	<b>EA</b>	<b>80</b>	<b>STK</b>
"Imidacloprid 0.5 granular insecticide is for systemic control of soil inhabiting pests in turfgrass and landscape plantings; featuring low use rates, application flexibility and great value. Use Sites: landscape, turf, trees, golf courses. Effective Against: southern masked chafer, northern masked chafer, Japanese beetle, European chafer, European crane fly, green June beetle and many others. Active Ingredients: Imidacloprid 0.5%. ## INSECTICIDES/MITICIDES

Product	Description	Active Ingredient	UM	Pack	Type
<b>04268</b>	<b>Permethrin SFR Pint</b>	<b>Permethrin 36.8%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Permethrin SFR is a broad-use professional strength termiticide/insecticide. Labeled for both pre and post-construction termite applications. Can be used on lawns, landscapes, ornamentals, around homes, sheds and barns on a variety of insects. Safe for use in and around animal housing, including poultry houses, and on listed animals Product Type: Professional. Use Sites: pre- and post-construction termite, lawns, landscapes, ornamentals, around homes, sheds and barns, in and around animal housing, including poultry houses, and on listed animals. Effective Against: ants, bees, beetles, boxelder bugs, cockroaches, crickets, earwigs, flies, millipedes, mole crickets, pillbugs, scorpions, silverfish, spiders, ticks, termites, wasps. Active Ingredients: Permethrin 36.8%. States Registered: AL, AR, AZ, CA, CO, CT, DE, FL, GA, HI, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY.					
<b>04269</b>	<b>Pivot Ultra Plus Aerosol STW 15 oz.</b>	<b>1% Etofenprox, 30% Pyriproxyfen and 0.05% Prallethrin</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Pivot Ultra Plus contains three active ingredients to help in flea management. A combination of adulticides and an insect growth regulator work together to manage flea populations in treated areas. One application of Pivot Ultra Plus kills adult and larval fleas, while the IGR affects hatching eggs. Contains 1% Etofenprox, 30% Pyriproxyfen and 0.05% Prallethrin. Available in 15 ounce cans. Continuous flea protection for up to 90 days.Kills 100% of fleas in 1 minute.No PPE is required.Can be used indoors/outdoorsCan be applied directly to carpets, upholstered furniture, pet bedding.Product Type: Professional Use Sites: For use in and on buildings and structures such as homes, apartments, hotels, offices, stores, warehouses, schools, nursing homes, hospitals, industrial buildings, vessels, rail cars, trucks, trailers, and aircraft (except cabins).Effective Against: Fleas, roaches, ants (excluding Carpenter, Harvester, and Pharaoh ants), waterbugs, silverfish, crickets, sowbugs and carpet beetlesActive Ingredients: Etofenprox 1%, Pyriproxyfen 1.3%, Prallethrin 0.05%States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY"					
<b>04270</b>	<b>Proflex Encapsulated Insecticide</b>	<b>Lambda-cyhalothrin 3.88%, Novaluron 1.30%, Pyriproxyfen 1.30%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Proflex is a microencapsulated concentrate containing Lambda-Cyhalothrin, Novaluron, and Pyriproxyfen. These 3 active ingredients provide 3 modes of action that make ProFlex your fast-acting and long-lasting solution for several hard to control pests including mosquitoes, cockroaches, fleas and ticks. Use Sites: For use in, on and around buildings and structures for the control of listed pests, including on lawns, ornamental trees and shrubs around residential, institutional, public, commercial, agricultural and industrial buildings; and parks, recreational areas and athletic fields. Other areas of use include industrial buildings, houses, patios, porches, closets, furniture, apartment buildings, mobile homes, laboratories, buses, greenhouses (non-commercial), stores, factories, warehouses, wineries, vessels, railcars, trucks, trailers, aircraft (cargo and other non-cabin areas only), schools, nursing homes, hospitals, mausoleums, restaurants, hotels, correctional facilities, livestock/poultry housing, pet kennels, food granaries, food grain mills and food manufacturing, processing, and servicing establishments. Effective Against: Ants (including RIFA), bed bugs, cockroaches, crickets, earwigs, firebrats, silverfish, stinkbugs, fleas, ticks, flying insect pests, stored product pests, boxelder bugs, centipedes, millipedes, mosquitoes, pillbugs, and sowbugs. Active Ingredients: Lambda-cyhalothrin 3.88%, Novaluron 1.30%, Pyriproxyfen 1.30%.					
<b>04278</b>	<b>Stryker 5-4 Insecticide STW Aerosol 15 oz.</b>	<b>Pyrethrins 0.5%, Piperonyl Butoxide 4%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Stryker 5-4 Aerosol Contact Insect Spray includes an injector that flushes insects out of cracks and crevices. Stryker 54 is useful as an inspection and identification tool. Contains 0.5% Pyrethrins and 4% Piperonyl Butoxide. Available in 15 ounce can.					
<b>04277</b>	<b>Stryker Insecticide Pint</b>	<b>Pyrethrins 6.00%, Piperonyl butoxide 60.00%</b>	<b>EA</b>	<b>3</b>	<b>STK</b>
Stryker® is a multi-purpose concentrate insecticide that contains 6% pyrethrins and 60% piperonyl butoxide for a fast knockdown and efficient control of insect pests. Stryker can be mixed with other insecticides or insect growth regulators to enhance its effectiveness. Stryker is multi-purpose, quick-kill insecticide that is for wide area adult mosquito control. May be applied through mechanical aerosol or ULV generators including thermal fogging equipment.					
<b>04279</b>	<b>Stryker Wasp &amp; Hornet Spray STW Aerosol 15 oz.</b>	<b>Prallethrin 0.1%</b>	<b>EA</b>	<b>12</b>	<b>STK</b>
Stryker Wasp and Hornet Killer Pressurized Solutions kills on contact up to 20 feet away providing application safety. Can be used outdoors and in attics and crawl spaces. Contains 0.1% Prallethrin. Available in 15 ounce can. Stryker Wasp & Hornet is formulated to knockdown wasps and hornets so quickly that they cannot release their stinging pheromones, therefore reducing the possibility of stings. Kills wasps, spiders, hornets and yellowjackets on contact. Use Sites: For outdoors and in attics and crawl spaces only. States Registered: AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY					
<b>04030</b>	<b>Summit BTI Mosquito Briquets 20/card</b>	<b>Bacillus thuringiensis israelensis</b>	<b>BG</b>	<b>5</b>	<b>STK</b>
Drop briquets into standing water or potential breeding sites. As they slowly dissolve, they release a bacterium which is toxic to mosquito larvae. Kills larvae of mosquitos that may transmit Zika, West Nile, Dengue, Chikungunya and Yellow Fever. 20 briquets per card.

## MISCELLANEOUS CHEMICALS

Product	Description	Active Ingredient	UM	Pack	Type
<b>05110</b>	<b>Hot Sauce Repellant 1/2 Gallon</b>	<b>Capsaicin 2.5%</b>	<b>EA</b>	<b>6</b>	<b>OAN</b>
Hot Sauce Animal Repellent is a water-miscible, highly concentrated extract derived from hot peppers. Animals attempting to feed upon treated plants or other items are unlikely to be harmed. A warm sensation which the product is believed to cause in the throats of these animals may discourage feeding in situations where the animals have freedom to select other foods. Vapor Gard, an anti-transpirant film former, may prolong the effective life of Hot Sauce. Always read and follow label directions. Important: Always read and follow label instructions. All products may not be registered for sale or use in all states. Please check with your local Extension Service to ensure registration status.					
<b>05050</b>	<b>Indicate 5 Adjuvant Gallon</b>	<b>Blend of Alkyl Aryl Ethoxylates &amp; Water 80%</b>	<b>GL</b>	<b>4</b>	<b>STK</b>
Patented INDICATE 5 is the only adjuvant that contains a built in pH indicator, turning the spray water pink as soon as the optimum level of 4.5-5.5 is reached. It eliminates the need to test the water pH with any additional equipment. INDICATE 5 counters both the detrimental effects of high pH and hard water on sensitive pesticides. Chemicals sensitive to alkaline hydrolysis include: Glyphosate, Organo Phosphates, Synthetic Pyrethroids, Carbamates, Chlorinated Hydrocarbons, Triazines and others. INDICATE 5 acts as a wetting, spreading and penetrating agent resulting in an even film of spray over the leaf and better pesticide performance.					
<b>05018</b>	<b>Selontra Rodent Bait 8 lb. Pail</b>	<b>Cholecalciferol</b>	<b>EA</b>	<b>1</b>	<b>STK</b>
Selontra rodent bait delivers real efficiency for your business. It controls entire infestations in just seven days, which lowers both your labor and material costs. Its shortened baiting program requires less bait, and the stop-feed action of the active ingredient, cholecalciferol, makes a little go a long way: rodents eat only enough for a lethal dose, leaving more for the rest of the colony. Selontra rodent bait is effective against anticoagulant-resistant rodents, and it demonstrates proven palatability even when desirable food sources are available. And with a durability that holds up in tough conditions, rodent bait creates less waste, so it takes care of business while making yours more efficient. Selontra rodent bait offers three major advantages to your business:— Fast colony kill: Controls infestations in seven days in U.S. field trials— Efficient use of bait: Allows for shorter baiting programs, less bait to kill populations, and reduced waste— Effective resistance management: Kills anticoagulant-resistant rodents.					
<b>05211</b>	<b>Trapper Glue Board Rat 2/pack</b>		<b>PK</b>	<b>24</b>	<b>STK</b>
Non-poisonous TRAPPER MAX and TRAPPER MAX FREE Glue Traps for mice and insects provide maximum performance and real value. This extra-large, glue-covered surface provides 29 sq. in./187 sq. cm of capture area. Combining performance with value in a glue trap, TRAPPER MAX and TRAPPER MAX FREE Glue Traps contain Bell's exclusive glue formulation that has been vigorously tested to ensure maximum holding power for maximum capture rates. Strict standards ensure the highest quality glue every time. This versatile trap can be used many ways to capture mice or insects. Depending on the situation, use it either flat or folded into a covered trap. The easy-to-remove release paper saves time, providing the fastest, easiest system compared to other peel-off glue traps. TRAPPER MAX FREE is Bell's hypoallergenic, scent-free glue trap, ideal for use in schools, offices and other locations where allergens and odors may be a concern.
